

Santa Cruz County Regional Transportation Commission's

Elderly & Disabled Transportation Advisory Committee

(Also serves as the state-mandated Social Service Transportation Advisory Council)

SPECIAL MEETING AGENDA

NOTE special date & time

1:00 pm, Tuesday, May 14, 2013 Regional Transportation Commission, 1523 Pacific Ave, Santa Cruz

- 1. Call to Order
- 2. Introductions
- 3. Oral Communications

The Committee will receive oral communications during this time on items not on today's agenda. Presentations must be within the jurisdiction of the Committee, and may be limited in time at the discretion of the Chair. Committee members will not take action or respond immediately to any Oral Communications presented, but may choose to follow up at a later time, either individually, or on a subsequent Committee agenda.

4. Additions or deletions to consent and regular agendas

REGULAR AGENDA

- 5. Receive Complete Streets Assessment Project List to be discussed at June 11 E&D TAC meeting RTC staff (page 2)
- 6. Revised Transportation Development Act Claim from Community Bridges Community Bridges staff (page 21)
- 7. Adjourn

Next meeting time and location:

• 1:30 pm, June 11, 2013 @ the RTC Watsonville office – Watsonville Civic Plaza Building, 275 Main St., Suite 450, Watsonville, 95076 (4th Floor)

HOW TO REACH US

Santa Cruz County Regional Transportation Commission 1523 Pacific Avenue, Santa Cruz, CA 95060

Phone: (831) 460-3200 / fax (831) 460-3215
Email: info@sccrtc.org / website: www.sccrtc.org

ACCOMMODATIONS FOR PEOPLE WITH DISABILITIES

The Santa Cruz County Regional Transportation Commission does not discriminate on the basis of disability and no person shall, by reason of a disability, be denied the benefits of its services, programs, or activities. This meeting location is an accessible facility. If you wish to attend this meeting and require special assistance in order to participate, please contact RTC staff at 460-3200 (CRS 800/735-2929) at least three working days in advance of this meeting to make arrangements. People with disabilities may request a copy of the agenda in an alternative format. As a courtesy to those person affected, please attend the meeting smoke and scent-free.

SERVICIOS DE TRADUCCIÓN/TRANSLATION SERVICES

Si gusta estar presente o participar en esta junta de la Comisión Regional de Transporte del condado de Santa Cruz y necesita información o servicios de traducción al español por favor llame por lo menos con tres días laborables de anticipo al (831) 460-3200 para hacer los arreglos necesarios. (Spanish language translation is available on an as needed basis. Please make advance arrangements (at least three days in advance by calling (831) 460-3200.

AGENDA: May 14, 2013

TO: Elderly and Disabled Transportation Advisory Committee

FROM: Grace Blakeslee, Transportation Planner

RE: Complete Streets Assessment – Draft Regional Transportation Plan

Project List

NOTE: This item will be discussed at the June 11, 2013 Elderly and Disabled Transportation Advisory Committee Meeting, but is being provided to the Elderly and Disabled Transportation Advisory Committee one month in advance to allow sufficient time for review.

RECOMMENDATIONS

Staff recommends that the Elderly and Disabled Transportation Advisory Committee:

1. Review and provide input on the complete streets projects recommended for inclusion in the 2014 Santa Cruz County Regional Transportation Plan (RTP) project list (Attachment 2).

BACKGROUND

A complete streets analysis is part of the development of the 2014 Santa Cruz County Regional Transportation Plan and Association of Monterey Bay Area Governments (AMBAG) sustainable communities strategy. The complete streets analysis consists of both a needs assessment and development of complete streets guidelines. The goal of a complete streets needs assessment is to identify transportation improvements, particularly in areas identified for growth, which will provide safe mobility for all users including bicyclists, pedestrians, transit riders and motorists. Complete streets is also a key strategy for reducing greenhouse emissions and promoting healthier communities by encouraging active transportation. Complete street guidelines will be developed to identify strategies for transitioning auto-oriented streets into complete streets and to be utilized in the circulation elements of the local jurisdictions' general plans.

DISCUSSION

Complete Streets- Focus Areas

RTC staff evaluated complete streets transportation attributes in areas identified for increased density and diversity of land use as part of the sustainable communities

strategy planning effort underway by the Association of Monterey Bay Area Governments (AMBAG) in coordination with the Santa Cruz County Regional Transportation Commission (RTC). Regional Transportation Commission (RTC) staff primarily relied on the land use place types designated by AMBAG, in coordination with planning departments, when selecting focus areas for the complete streets assessment. The list of areas included in the complete streets assessment is included as Attachment 1. The depth of analysis for each area corresponded to the level of detail available about future land-use. For instance, a less detailed analysis was completed for those areas where future land-use is currently being examined by the Santa Cruz County Planning Department as part of their transit corridors project. A more detailed analysis was completed for those areas with current general or local area plans.

Complete Streets- Project Criteria

Based on the complete streets assessment for each focus area and information available about future land use, RTC staff identified investments which provide enhanced bicycle, pedestrian and transit environments and serve all user groups, including less experienced bicyclists and pedestrians, and vulnerable users (children, youths, disabled persons and seniors). To achieve these, a focus was given to identifying opportunities to develop what are often referred to as low stress routes; to give greater emphasis to the quality, comfort and convenience of bicycle, pedestrian and transit facilities; and to support alternatives to driving for shorter trips. Complete streets projects recommended for inclusion in the RTP fall into one of the following categories: bicycle/pedestrian enhancement, pedestrian crossing, complete bike/pedestrian network, bike intersection improvements, new bike/ped connection, bike parking, neighborhood bike/ped streets, pedestrian places crosswalk frequency, commercial area bike/ped access, traffic calming, signal synchronization, HOV/transit priority, transit pullouts, way finding, and enhanced user perspective.

Complete Streets Projects- Draft RTP Project List

The complete streets project list shown in <u>Attachment 2</u>, is a combination of projects already included in the Draft RTP project list ("Existing Projects"), projects for which RTC staff is recommending revisions to the project description to address complete streets project objectives ("Modified Projects") and projects not previously included ("New Projects") that emphasize bicycle, pedestrian and transit facilities in focus areas. The complete streets project list also recommends broader types of projects in areas where intensified use is reasonably expected to occur but where a detailed analysis was not completed as part of this effort. With inclusion of projects as shown in <u>Attachment 2</u>, over 35% of the Draft RTP projects are considered complete street type projects.

Draft RTP Project List- RTP and Sustainable Communities Strategy (SCS) Scenario Planning

In order to determine which projects in the RTP and SCS will be on the constrained vs unconstrained list, a scenario planning process will be used. Scenarios will be analyzed for their ability to achieve the SB 375 greenhouse gas emission targets as well as the other RTP and MTP goals and performance measures. RTC and AMBAG

will be using sketch model tools, the regional travel demand model and postprocessing tools for this analysis. Projects must be included in the Draft RTP project list in order for projects to be considered in the scenario planning effort.

As a result of the complete streets assessment and in preparation for the scenario planning effort to be conducted by AMBAG, RTC staff is recommending that the Elderly and Disabled Transportation Advisory Committee review and provide input on new and modified complete streets projects for the Draft RTP project list (Attachment 2).

Next Steps

Staff expects that the RTC will consider updating the Draft RTP project list to identify complete streets projects and include new projects in June. Meanwhile, AMBAG and RTC will be grouping projects into financially "constrained" packages that would be implemented under the scenario planning process that support development of the Regional Transportation Plan and Metropolitan Transportation Plan. RTC staff will provide more information to the Elderly and Disabled Transportation Advisory Committee about the scenario planning process at the June the Elderly and Disabled Transportation Advisory Committee meeting. The RTC is expected to consider the results of the initial scenario at the June Transportation Policy Workshop.

Developing the complete streets guidelines is the next phase in the complete streets initiative. The complete streets guidelines will provide information about how to implement complete streets projects and policies in the Monterey Bay Area. RTC staff will be working jointly with the Transportation Agency for Monterey County, the San Benito Council of Governments and the Association of Monterey Bay Area Governments. Input gained from surveys and the recent complete streets assessment will be considered in development of the guidelines. RTC staff is expected to return to the Elderly and Disabled Transportation Advisory Committee with an outline for the guidelines in June.

SUMMARY

The complete streets analysis is part of the development of the 2014 Santa Cruz County Regional Transportation Plan and Association of Monterey Bay Area Governments (AMBAG) sustainable communities strategy. The complete streets analysis consists of both a needs assessment and development of complete streets guidelines. RTC staff evaluated complete streets transportation attributes in areas identified for increased density and diversity of land use as part of the sustainable communities strategy planning effort underway by the Association of Monterey Bay Area Governments (AMBAG) in coordination with the Santa Cruz County Regional Transportation Commission (RTC). Based on the complete streets assessment, RTC staff identified investments which provide enhanced bicycle, pedestrian and transit environments and serve all user groups. RTC staff is recommending that the Elderly and Disabled Transportation Advisory Committee review and provide input on new and modified complete streets projects for the Draft RTP project list (Attachment 2).

NEW	Ą	City of Watsonville	Freedom Blvd (Green Valley Rd to Lincoln) Bicycle and Pedestrian Improvements	Evaluate and if feasible, install bicycle treatments (such as painted and/or buffered lanes) to address speed inconsistency between bicyclists and vehicles and install bike boxes and bike priority at major intersections. Complete sidewalks, including pedestrian buffer, and pedestrian islands at crossings.
Modified	WAT-39	City of Watsonville	Freedom Blvd Reconstruction (Alta Vista to Broadis)	Full depth rehab (reuse existing materials), relocate utilites, traffic signal detection upgrades/install traffic cameras, concreate pads at bus stop, signage and stiping, including shares for billing, including shares for billing, including curb, gutter, sidwalk; modification to reatiaing wall between Crewtview and Alta Vista. Evaluate and if feasible, install bicycle treatments (such as painted and/or buffered lanes) to address speed inconsistency between bicyclists and vehicles and install bike boxes and bike priority at major intersections. Complete sidewalks, including pedestrian buffer, and pedestrian islands at crossings.
Modified	WAT-P11	City of Watsonville	Freedom Blvd Improvements (Green Valley Rd to Compton Terrace)	Pavement reconstruction, operation imporvements (turn lanes), installation of bike lanes, sidewalks, signing and striping. Evaluate and if feasible, install bicycle treatments (such as painted and/or buffered lanes) to address speed inconsistency between bicyclists and vehicles and install bike boxes and bike priority at major intersections. Complete sidewalks, including pedestrian buffer, and pedestrian islands at crossings.
Modified	WAT-P33	City of Watsonville	Freedom Blvd Reconstruction (Davis to Alta Vista)	blooker treatments (such as painted and/or buffered lanes) to address speed inconsistency between bicycle treatments (such as painted and/or buffered lanes) to address speed inconsistency between bicyclists and vehicles and install bike boxes and bike priority at major intersections. Complete sidewalks, including pedestrian buffer, and pedestrian islands at crossings.
Modified	WAT-P45	City of Watsonville	Green Valley (Freedom to City Limits)	Reconstruct or repave roadway and bikelanes; repair, replace and install curb gutter, sidewalk and curb ramps; replace and upgrade striping. Evaluate and if feasible, including pedestrian buffer and bike treatments (such as painted and/or buffered lanes).
NEW		City of Watsonville	Freedom Blvd Pedestrian Crossings (Airport to Lincoln)	Evaluate and it reasible, install new and improve existing uncontrolled pedestrian crossings at Roach Raod, Davis Avenue, Clifford Lane, Mariposa Avenue, Alta Vista Street, Crestview Drive, Martinelli Street and Marin Street).
NEW		City of Watsonville	Pajaro Lane to Freedom Blvd Ped/Bike Connection	Evaluate and it reasitive, new bike ped connection between from regard Lane to receive the Blvd between to connect neighborhood to goods, services and transit on Freedom Boulevard. Include new crossing from new bicycle/pedestrian facility to west side of Freedom Boulevard.

Could be a stand alone project (\$315M), but currently expensed under larger Hwy 1 HOV Lane project (RTC)

COMMUNITY BRIDGES Puentes de la Comunidad

236 Santa Cruz Avenue, Aptos, CA 95003 P. 831.688.8840 F. 831.688.8302 www.communitybridges.org

May 1, 2013

Ms. Karena Pushnik, Sr. Transportation Planner Santa Cruz County Regional Transportation Commission 1523 Pacific Avenue Santa Cruz, CA 95060-3911

Dear Ms. Pushnik:

Thank you for receiving our attached revised TDA claim for 2013-2014. Please notice we have made the following changes in response to the recommendations made by the Elderly & Disabled Transportation Advisory Committee (E&DTAC):

1. Increased TDA funds allocated to Medical rides by \$33,763;

2. Decreased TDA funds allocation to Elderday by (\$33,725).

By making these adjustments to our Exhibit C-2 Operation Plan over our original TDA claim dated March 18, projected service levels will be affected as follows:

TDA-funded Medical rides will increase by 733;

2. TDA-funded Elderday rides will decrease by (1,573).

Note this TDA claim represents a 44% increase in TDA ride service levels than we committed to providing in 2012-13—providing over 10,000 more TDA rides—while our funding request increase is 13%. Overall services are up by 33%, or over 20,000 rides, as we'll be providing 82,778 rides over last year's 62,378 rides.

Where we have seen much of this growth is in our Same Day and Out of County ride programs, which Lift Line initiated last year through Caltrans 5317 funding. These new services address Unmet Needs numbers 14 and 16 of the 2012 revised Unmet Needs List of the Regional Transportation Plan Goals and Targets, and we have allocated \$245,000 in funding to match these TDA-eligible ride types.

I am also attaching a copy of today's news article about Community Bridges' acquisition of the Elderday program, highlighting the variety of vital medical services provided to Elderday's elderly and disabled participants every day. Transportation for Elderday participants meets Unmet Need number 12.

Note we are also attaching two versions requested of Exhibit A Program Budget. Please contact me if additional information is needed to forward our claim.

Thank you,

Chief Executive Officer

New sponsor rescues Elderday: Community Bridges takes over adult day health care center from Salud

By Donna Jones Santa Cruz Sentinel

Posted: 04/30/2013 06:30:54 PM PDT

SANTA CRUZ -- The Lift Line vans started rolling into the parking lot on Pioneer Street about 10 a.m. Tuesday, and continued for the next 30 minutes or so, dropping off dozens of seniors, many using walkers or riding in wheelchairs.

Elderday staff rushed out to greet the arrivals, escorting them one by one into the adult day health care center.

For the next four to five hours, the staff would monitor medical conditions, dispense medications, oversee physical and occupational therapies, and serve snacks and lunch. For 120 mostly elderly clients with physical or mental impairments, the center is a lifeline that has kept them out of nursing homes.

It was almost snatched away due to state budget cuts. But after years of financial uncertainty, Elderday's future appears more secure after a transfer of the program from Salud Para La Gente to Community Bridges in April.

"We've been through so much, and were afraid we were going to close," said social worker Manuel Coto. "We're just thankful Community Bridges stepped in."

Sam Storey, the nonprofit's chief executive officer, described the move as a "homecoming."

Community Bridges sponsored the program for more than two decades, starting in 1982. But Storey said, like most nonprofit programs, Elderday ran on a "shoestring," and in 2004 Community Bridges handed off the program to Salud, which qualified for a higher Medi-Cal reimbursement rate.

"We were always just trying to make that budget work year to year," Storey said. "We were getting \$68 (a day per Medi-Cal client) back then. Salud was able to get \$106. That was our principal motivation."

At peak funding, Salud was receiving \$120 per client per day, but then the state budget crisis hit. Eligibility criteria was tightened and the state slashed the reimbursement rate to \$76. Across California, adult centers began to close. In November, facing a \$200,000 shortfall, Salud's board considered closing Elderday, but held off to explore other options.

Marc Pimentel, president of Salud's board, said Elderday's financial pressures were putting the nonprofit's core health programs at risk.

"All of our intentions, first and foremost, was to maintain services," Pimentel said. "That was our primary goal, and Salud was not going to be able to maintain them."

That's when talks began with Community Bridges. Because the nonprofit also operates Lift Line, it was able to realize some savings in administrative efficiency. Elderday's landlord, Ow Family Properties, agreed to reduce the rent.

But the shift hasn't been painless. Coto and other staff members saw their hours and wages cut, representing as much as a 30 percent loss in income, Storey said. Despite the hardship, few workers elected to leave.

Coto, the social worker, and his co-workers talked about how much the program means to participants, how attached they are to their clients.

Coto, a father of two, said the pay cut hurt, and his family will have to cut back. But he wants to stay. The important thing, he said, is services have remained the same.

"I took the hit, and am going to see if I can stand," Coto said. "I'm a little wobbly."

COMMUNITY BRIDGES Puentes de la Comunidad

May 1, 2013

Ms. Karena Pushnik, Sr. Transportation Planner Santa Cruz County Regional Transportation Commission 1523 Pacific Avenue Santa Cruz, CA 95060-3911

Dear Ms. Pushnik:

Thank you for receiving our attached revised TDA claim for 2013-2014. Please notice we have made the following changes in response to the recommendations made by the Elderly & Disabled Transportation Advisory Committee (E&DTAC):

- Increased TDA funds allocated to Medical rides by \$33,763;
- 2. Decreased TDA funds allocation to Elderday by (\$33,725).

By making these adjustments to our Exhibit C-2 Operation Plan over our original TDA claim dated March 18, projected service levels will be affected as follows:

- 1. TDA-funded Medical rides will increase by 733;
- 2. TDA-funded Elderday rides will decrease by (1,573).

Note this TDA claim represents a 44% increase in TDA ride service levels than we committed to providing in 2012-13—providing over 10,000 more TDA rides while our funding request increase is 13%. Overall services are up by 33%, or over 20,000 rides, as we'll be providing 82,778 rides over last year's 62,378 rides.

Where we have seen much of this growth is in our Same Day and Out of County ride programs, which Lift Line initiated last year through Caltrans 5317 funding. These new services address Unmet Needs numbers 14 and 16 of the 2012 revised Unmet Needs List of the Regional Transportation Plan Goals and Targets, and we have allocated \$245,000 in funding to match these TDA-eligible ride types.

I am also attaching a copy of today's news article about Community Bridges' acquisition of the Elderday program, highlighting the variety of vital medical services provided to Elderday's elderly and disabled participants every day. Transportation for Elderday participants meets Unmet Need number 12.

Note we are also attaching two versions requested of Exhibit A Program Budget. Please contact me if additional information is needed to forward our claim.

Thank you,

Chief Executive Officer

March 18, 2013

Mr. George Dondero, Executive Director Santa Cruz County Regional Transportation Commission 1523 Pacific Avenue Santa Cruz, CA 95060-3911

Re: CTSA/City of Santa Cruz claim for 2013-2014 TDA revenues

Dear Mr. Dondero:

The City of Santa Cruz has agreed to act as Community Bridges' claimant for the 2013/2014 fiscal year Transportation Development Act funds allocated to the Consolidated Transportation Services Agency (CTSA). Please accept this letter that Community Bridges Lift Line attests to the accuracy of the claim and all its accompanying documentation

The City of Santa Cruz will be requesting a total of \$599,743 in TDA funds for the CTSA. The proposed payment schedule (Exhibit D includes an increased initial payment to cover annually remitted expenses including a substantial insurance premium due in July. The remaining quarters are adjusted for the difference.)

These funds will allow Community Bridges to continue to operate a variety of vital specialized transportation programs serving low income seniors and disabled individuals who are unable to utilize traditional public transit. TDA funds will be used for the Taxi Scrip programs operating in South and North County, transportation to Meals on Wheels Senior Dining Centers, non-emergency medical transportation, Winter Shelter Program and Elderday Adult Day Health Center transportation.

Enclosed are:

1. 2013/2014 TDA Claim Form

2. 2013/2014 Operating & Capital Budget (Exhibit A, pages 1-3)

- 8. Project/Program Description/Scope (use additional pages, if needed, to provide details such as work elements/tasks. Please see Exhibit C-1 and C-2 attached.
- 9. Project Location/Limits (attach a map and/or photos if available/applicable, include street names):

The TDA funding for CTSA is to coordinate and provide social service transportation services with existing fixed-route service of public and private transportation providers for low-income elderly and disabled Santa Cruz County residents according to the requirements of the Social Services Transportation Improvement Act.

10. Justification for the project. (Why is this project needed? Primary goal/purpose of the project; problem to be addressed; project benefits; importance to the community)

Community Bridges has been the designated Consolidated Transportation Services Agency (CTSA) since 1982. CTSAs are authorized under California Government Code Sections 15975 and 15950-15952 which were enacted pursuant to the Social Service Transportation Improvement Act. The purpose of the CTSA is to improve transportation required by social service recipients by promoting the consolidation and coordinating of social service transportation.

As the Consolidated Transportation Service Agency, Lift Line is coordinating transportation services with other transportation and human service agencies in order to provide the most efficient transportation possible. Some of them are the Family and Children's Services of the County of Santa Cruz, County Office of Education, Veterans Service Offices in Santa Cruz and Palo Alto, and other hospitals and medical facilities.

Lift Line is also working closely with several other non-profit organizations and other counties to continue to identify unmet needs and define effective responses to meet those needs to help mobilize resident with various disabilities, low income and senior populations to travel easily throughout our county as well as to travel seamlessly throughout our tri-county region, also now to include the Santa Clara County. This is consistent with the Association of Monterey Bay Area Governments (AMBAG) Coordinated Public Transit Plan.

The benefits to having CTSA coordination is to improve and identify the need for specialized transportation equipment, if the equipment is funded through Caltrans 5310 and isn't reaching its proposed requirements, as the CTSA, the equipment can be coordinated for use through other identified paratransit services.

Pursuant to the CTSA designation for Santa Cruz County, Community Bridges operates the Lift Line transportation program, which works in identifying unmet transportation needs, coordinates and provides social service transportation services to low-income seniors, disabled residents, underserved populations and other persons in Santa Cruz County. Lift Line directly addresses the issues identified through the unmet needs process by providing rides to medical appointments (including dialysis), alternative care, mental health and various therapy appointments.

11. Project Productivity Goals for this fiscal year:

a. Measures of performance, success or completion to be used to evaluate project/program (ex. increase use of facility/service, decrease collisions, etc.):

The majority of our dispatching/scheduling is automated with Mobile Data Computers (MDC) and Automatic Vehicle Locaters (AVL) that integrate with Trapeze, making it easy to make changes if needed and track rides as they occur. As rides are completed, the MDCs tag completed rides with real pickup and drop-off times and highlights these times in blue, making it easier for our dispatchers to monitor all rides. Likewise, uncompleted or unassigned rides (such as will-call returns) are highlighted in red to inform the dispatcher of the priority of pending trips. The addition of the AVLs in the fleet allows Lift Line to monitor and track vehicles at any moment. These systems allow Lift Line to provide accurate monthly encounter data to satisfy data requirements. We will continue to provide our quarterly TDA reports, with the RTC reporting requirements, which are generated directly from the actual rides performed and documented through these systems. Lift Line Dispatch System still has some components that are manual, for back up in case of power loss or technical problems that occasionally occur, when connections through the system can not be made. Since we can not determine in advance when a power or technical problem should arise, we give all drivers a paper manifest to work from daily so as to not lose any information. Daily drivers fill out paper work to let us know if they have any incidents, accidents or mechanical failures. In order to track turndowns and referrals anyone answering the phones keep track daily on a specified phone log.

Performance Measures to be included in Quarterly Reports

2. Total passenger trips (units of service) per month3. Incidents per month	The c	The quarterly reports are to include the following:					
3. Incidents per month	1.	Unduplicated passengers per month					
	2.	Total passenger trips (units of service) per month					
4. Accidents per month	3.	Incidents per month					
- I	4.	Accidents per month					

5.	Mechanical failures* (including lift failure) per month
6.	No-shows per month
7.	Turndowns or referrals per month
8.	Cancels per month
9.	Donations per month
10.	Total operating cost per passenger
11.	Total operating cost per vehicle service hour
12.	Total passengers per vehicle service hour
13.	Total passengers per vehicle service mile
14.	Fare box recovery level
15.	Van mileage per program
16.	% of Rides performed by subcontractors
17.	% of shared trips/ Average vehicle occupancy
18	% of cancellations of total rides

*Mechanical failure means any problem which results in a delay of one hour or longer, or cancellation of service.

b. Number of people to be served/anticipated number of users of project/program (ex. number of new or maintained bike miles; number of people served/rides provided):

Lift Line's is projecting to provide service to over 600 Santa Cruz County residents who will need specialized wheel-chair accessible vans. We are projecting to provide and coordinate over 80,000 rides in the 2013/2014 fiscal year. Please see Exhibit C-1 and C-2 Operating Plan for details. Lift Line will continue to provide responsive, non-emergency health and medical paratransportation for seniors and disabled residents of Santa Cruz County, all of which are low-income. Trips are provided to health and medical destinations such as hospitals, medical centers and clinics, doctors' offices, pharmacies, dialysis centers, human services, and various mental health and physical therapy appointments. In partnership with Central Coast Alliance for Health, rides to medical destinations will be provided for qualified members. Lift Line continues to work closely with Watsonville Dialysis and Santa Cruz Satellite Dialysis to provide flexible services for its clients who are unable to use transit or METRO ParaCruz services.

12. Consistency and relationship with the Regional Transportation Plan (RTP) - Is program/project listed in the RTP and/or consistent with a specific RTP Goal/Policy?

This is RTP project #VC-P1. It is consistent with Goals #1 and #2 to maintain the transportation system and increase mobility;

- Policy 1.3.5 to coordinate specialized transportation services;
- Policy 1.3.9 to Encourage volunteer, friend and relative-provided transportation for the elderly and disabled, especially in rural areas;
- Policy 3.6 Promote social equity with all transportation decisions, including consideration of income, gender, race, age, physical and mental ability, and transit dependency; Policy 3.6.3 Support programs that address the transportation needs of low-income people;
- Policy 5.4.6 Give high priority to currently unmet needs for essential (medical or medically related) transportation for expansion of TDA-funded paratransit service. Community Bridges and Lift Line staff works with the Regional Transportation Commission and the members of the Elderly and Disabled Transportation Advisory Committee, Human Care Alliance, and the local Senior Network Agency to identify specialized transportation needs for Santa Cruz County. Lift Line as a program of Community Bridges works closely with local human service and transportation programs on local and regional coordinated plan projects, as required by Federal and State Transportation Agencies. These are included in both the RTP, which is updated every 3-5 years, and the AMBAG Monterey Bay Coordinated Human Services Transportation Plan. Projects/programs in the RTP within Projected Funds list include: continued non-ADA mandated paratransit services including medical service rides, Elderday adult day health care, senior meal sites, non-emergency same day transportation for medically fragile individuals, and expanding the non-ADA mandated paratransit system to meet the growing specialized transportation needs of seniors and people with disabilities.

13. Impact(s) of project on other modes of travel, if any (ex. parking to be removed):

Lift Line is a complementary service to the ADA-mandated METRO ParaCruz service. In addition, Lift Line provides a more flexible specialized transportation service for ongoing identified unmet immediate service needs. Due to the diverse nature of our services, Lift Line is able to group riders in various service categories, which ultimately reduces the number of vehicles needed to perform rides and in turn cuts down on traffic and emissions. In the current fiscal year 2012-2013, Lift Line is continuing to optimize our service by scheduling rides in the most efficient manner and ultimately reducing the duplication of rides by grouping ride types for long distance, cross county rides.

Furthermore, Lift Line provides residents with specialized transportation needs who do not qualify for ParaCruz rides because they live outside the service area (more than ¾ mile from fixed transit route) and don't have family or friends to assist them, their mobility device is too large, and/or they may need same day service. For people who are low-income or who face health/physical challenges, these services are paramount. Lift Line's goal is to continue to provide service in this manner, however, with the increase of fuel costs, even while grouping rides, we are still projecting increased costs in our overall service. Lift Line was also awarded Section 5317 grant for funds in 2012-2013 to support same day medical transportation service, as identified in the AMBAG unmet needs plan. This new service was implemented in 2013 and we are applying for 5317 funds to continue the project into 2014 while we gather data and assess the same-day transportation needs of our clients.

14. Estimated Project Cost/Budget, including other funding sources, and Schedule: (attach project budget). Specialized Transportation Claims require 10% local match. Local match can take the form of fares, donations, agency charges, grants, revenue sharing and other non-restricted sources. In kind services many NOT apply toward the local match.

What is the total project cost? Total CTSA Transportation Budget = \$1,664,539 (TDA only = \$599,743)

Is project fully funded? YES

What will TDA (and STA) funds be used on (ex. administration, brochures, engineering, construction)? These funds will be used for administration, all cost related to provision of paratransit rides, and vehicle/communications acquisition.

This is clearly identified in our Operating Plan Exhibit C-2. Please see TDA Operating Plan, Exhibit C-2.

Preferred Method and Schedule for TDA fund distribution	ı (see RTC Rules and Regulations fo	or details)
---	-------------------------------------	-------------

CTSA: Quarterly disbursement, with up to 35% in first quarter, and the remaining quarterly payments being one-third of the remaining claim amount;

OR Quarterly disbursement

16. TDA Eligibility:

TDA Englointy.	YES?/NO?
A. Has the project/program been approved by the claimant's governing body? Form of approval Community Bridges Board Resolution . (eg resolution, work program, budget, other document) If "NO," provide the approximate date approval is anticipated.	YES
B. Has this project previously received TDA funding?	YES
C. For capital projects, have provisions been made by the claimant to maintain the project or facility,	

or has the claimant arranged for such maintenance by another agency? (If an agency other than the Claimant is to maintain the facility provide its name:	YES
D. Bike, Ped, and Specialized Transportation Claims: Has the project already been reviewed by the RTC Bicycle Committee and/or Elderly/Disabled Transportation Advisory Committee? (If "NO," project will be reviewed prior to RTC approval). <u>April 2013 E&D TAC meeting</u>	YES
E. For "bikeways," does the project meet Caltrans minimum safety design criteria pursuant to Chapter 1000 of the California Highway Design Manual? (Available on the internet via: http://www.dot.ca.gov).	N/A

SCMTD, CTSA, Bike to Work, CTSC Only - PLEASE KEEP ANSWERS BRIEF

17. Improving Program Efficiency/Productivity

 Describe any areas where special efforts have been made in the last fiscal year to reduce operating cost and/or increase ridership/program usage. Note any important trends.

Lift Line routes are continually assessed and re-structured to increase productivity, and we have succeeded in lowering some costs by grouping rides so that vehicles and staff time are serving at capacity as much as possible. Our overall cost per service unit has remained steady the past two years, even as individual costs and demands for service have fluctuated. In the case of taxi subcontractors, we have paid special attention to maximizing the benefit of working with these outside partners only when we have reached our internal existing capacity and there is a cost benefit to calling in a taxi ride. We also continue to work with physicians and participants to group rides for maximum efficiency. Our experienced drivers and dispatch staff, and the use of computerized scheduling equipment, continue to serve as valuable assets toward achieving these goals.

Community Bridges Lift Line continues to seek to open UTU negotiations to address ways to lower the economical issues impacting the operations of the budget. We also continue to work on reducing our workers compensation costs and exposures in order to reduce our premiums. Lift Line also maintained optimum fleet size for the services provided, and we continually seek to update our vehicles and equipment through grants.

The County Heath Services Department's programs such as In Home Health Services, as well as local medical facilities and the Senior Network Services, are assisting their clients to help fill out the TDA Medical Transportation Application and fax them with the required supporting documents to our office daily. We also work closely with the Central Coast Alliance to coordinate Medi-Cal eligible participants with medical rides.

Lift Line has participated in several outreach forums in the community that are addressing the transportation needs of the local senior and disabled population, including veterans, as well as conducted presentations to local service organizations and senior living facilities. Lift Line annually participates in local business and health fairs to increase community awareness about local transportation service.

Lift Line staff has also participated in numerous planning meetings and networking events to identify and expand services for area veterans. These efforts include attendance at county VetNet meetings and events, as well as participation in the newly formed Veterans Advisory Council. In the past year, Lift Line not only succeeded in securing new funding to sustain and expand our previously volunteer-supported Out-of-County transportation services, connecting Santa Cruz County veterans with VA facilities in Monterey and Santa Clara Counties, but we also continued to provide and promote our in-county veterans transportation services at three weekly pickup and drop off locations, including the veterans' centers in Capitola and Santa Cruz, as well as the Homeless Service Center, with the final destination being the County Veterans Services office.

Finally, Lift Line also initiated and promoted a new Same-Day service through Section 5317 funding, which is rapidly gaining momentum as it is the only service of its kind in Santa Cruz County. In our first two months of operation, we provided over 200 same-day rides each month, and, although this new service is still in its early stages, we anticipate readership to only increase as we continue to provide and promote this new service.

Goals for next fiscal year (ex. identify opportunities to maximize economies of scale, planned productivity improvements). Describe any areas where special efforts will be made to improve efficiency and increase program usage/ridership:

Lift Line will continue to assess the costs and demands for our services on an ongoing regular basis, and structure our routes and staffing to be as responsive and efficient as possible. Lift Line staff will continue to participate in outreach efforts to identify emerging needs in the community, and we will coordinate with service providers to meet the transportation needs of low-income elderly and disabled residents, including our area veterans. This year, we expect to make diligent progress toward increasing outreach and service to the veteran population through our various efforts that are already underway.

18. What is different from last year's program/claim?

Community Bridges Lift Line/CTSA is requesting TDA funds to assist with the same types of rides as last year, with the exception of the Out-of-County program which has been funded through a grant from Caltrans Section 5317. We are requesting funding for: Medical TDA Rides, Meals on Wheels, Elderday, Taxi Scrip, and the Winter Shelter programs.

This year we are expecting to increase transportation service for Elderday, as Community Bridges continues to work diligently on the acquisition of the Elderday program in order to bring to rest a several months and even years-long uncertainty of the program's future in the face of decreased Medi-Cal reimbursement rates. Community Bridges feasibility studies and operational plans for sustaining Elderday will bring more stability to the program, its participants and their families, where in previous months and years we saw decreased participation as participants prepared to seek alternatives in the event of the program's imminent closure. Looking at average Elderday participation rates over the past twelve months, we see that participation dropped as much as 24% in the month following the anticipated closing date that was schedule in response to state funding cuts, whereas participation has steadily increased ever since the closure has since been averted.

Lift Line is also expecting to exceed our prior year projections for service to the Homeless Service Center's Winter Emergency Shelter Program, where currently 30% of the clients transported are disabled, and 7% are seniors 60 or over. Many participants are also veterans, and at least one or two wheelchair-using participants are being transported both ways every day. By comparing the first three months of the program in this fiscal year to those of the last, participation is already up by 150% this year. Lift Line requests funds to offset the expenses incurred during winter months when additional shelter is provided at the National Guard Armory.

19. Schedule of regular progress reports including an evaluation at the end of the year:

CTSA: Specialized Transportation: Quarterly to E/D TAC, RTC: November 2013, January 2014, April 2014, July 2014 and year end report 13/14 (Months/Year)

CTSA and Volunteer Center (Article 8) Only

20. Are these transportation services responding to transportation needs not otherwise being met within the community or jurisdiction of the claimant? Describe.

Yes. For our target population we provide transportation that is otherwise not available. Lift Line paratransit services are provided to seniors and people with disabilities who can't drive, are not able or eligible to use our METRO or METRO ParaCruz services (do not have the financial resources, have origins/destinations out side the service area, need same-day service, or have wheelchairs that do not meet the size criteria). Also, the out of county TDA Medical ride services are used for residents who have no other resources, particularly due to financial restraints, to get to critical care treatment. The veterans we are currently providing paratransit services for are funded through the FTA Section 5317 New Freedom (NF) Grants Program. This grant has been awarded through December 31, 2013, and we are in the process of applying for the next grant cycle to

maintain this service for at least another year since the demand for service for this specific population has continued to grow. Even though the funds for this service potentially could come to an end, Lift Line/CTSA will continue to seek other funding sources to support this service, which will now become an unmet need in the coordinated plan. Another identified unmet need is to provide same day medical transportation, and Community Bridges was awarded a separate Section 5317 grant for funding to permit Lift Line/CTSA to hire two driver's and half time office support to be able to offer this same-day service.

21. Where appropriate, are these specialized transportation services coordinated with other transportation services? Describe.

Lift Line, as the CTSA, acts as the safety net transportation service for low-income seniors and disabled individuals unable to secure mobility through other programs. In addition, Lift Line coordinates and refers people daily to other services more suited to their specialized transportation requirements such as: METRO bus or METRO ParaCruz; local taxi services through the taxi scrip program; the Volunteer Center; Veterans Services and our in house "Out of County" TDA Medical ride service. Lift Line continues coordinates with the Central Coast Alliance for Health in Santa Cruz and Monterey Counties to get Medi-Cal patients to essential medical appointments who cannot transfer from their mobility device to a bus seat or are too large to use local METRO ParaCruz ADA guidelines services. We work closely with Watsonville Dialysis and Santa Cruz Satellite Dialysis to provide flexible service for the clients. We help identify an individual's specific need for specialized transportation service and coordinate not only services in our County, but also for rides to neighboring counties of San Benito, Monterey and Santa Clara. In addition, Lift Line assists those who call from other parts of California, as well as from out of the state, looking for other public and specialized transportation. Lift Line's staff will continue to participate with local and statewide transportation groups to develop coordinated processes and keep current on transportation systems for seniors and disabled residents.

22. Provide performance information, as pertinent, such as: verification of the operating cost per passenger, operating cost per vehicle service hour, passengers per vehicle service hour, passengers per vehicle service mile, and vehicle service hours per employee for last fiscal year (definitions available in Section 99247 of TDA Guidelines). (99246) (99246d, per 2010 Performance Audit)

All TDA reports, quarterly and annual are sent directly to the RTPA within the scheduled time schedules. These reports are included in the above listed performance measures.

23. Discuss the needs and types of the passengers being served and the employment of part-time drivers and the contracting with common carriers of persons operating under a franchise or license to provide services during peak hours. (99246)

There are times during the day when it is more cost effective or necessary to use taxi to provide some of the TDA Medical rides, especially when they are short rides and more on an individual need basis, while Lift Line buses provided more of the grouped rides. Lift Line has three on call drivers to assist with paratransit services as needed.

SCMTD, CTSA, Volunteer Center & RTC Only

- 24. List the recommendations provided in the last TDA Triennial Performance Audit and your progress toward meeting them.
 - Describe the work your agency has undertaken to implement each performance audit recommendation and the steps it will take to fully implement the recommendation.
 - For any recommendations that have not been implemented, explain why the recommendation has not been implemented and describe the work your agency will undertake to implement each performance audit recommendation.
 - Describe any problems encountered in implementing individual recommendations.

TDA Triennial Performance Audit Recommendations:

1) The SCCRTC should work closely with the Santa Cruz Metro, Community Bridges, and the Volunteer Center to develop an SRTP update, including the following plan elements: financially sustainable public transportation levels; vehicle replacement needs for each agency; and countywide performance goals objectives and measurable standards. The SCCRTC's involvement in the SRTP effort could include coordination, technical assistance, and partial funding.

Community Bridges is currently working with the entities to develop an updated SRTP. Currently the RTC and Metro are submitting a joint grant application for the plan. The majority of the work on the plan will be done by a consultant. Metro will be the formal lead, with extensive input from RTC, Community Bridges, and the Volunteer Center. In pursuing this grant the Short Range Transportation Plan would address the recommendations from the Performance Audit and include the Metro, Community Bridges and the Volunteer Center.

2) The current and future agreements that permit the pass-through of TDA Article 8 funds from the City of Santa Cruz to Community Bridges and the Volunteer Center should be amended to include the requirement that the performance measures identified in PUC Section 99246(d) be reported at least annually to the City and to SCCRTC.

Pulled from the California Public Utilities Code Section 99247 for reference:

For purposes of Section 99246, and as used elsewhere in this article:

- (a) "Operating cost" means all costs in the operating expense object classes exclusive of the costs in the depreciation and amortization expense object class of the uniform system of accounts and records adopted by the Controller pursuant to Section 99243, and exclusive of all subsidies for commuter rail services operated under the jurisdiction of the Interstate Commerce Commission and of all direct costs for providing charter services, and exclusive of all vehicle lease costs.
 - (b) "Operating cost per passenger" means the operating cost divided by the total passengers.
 - (c) "Operating cost per vehicle service hour" means the operating cost divided by the vehicle service hours.
- (d) "Passengers per vehicle service hour" means the total passengers divided by the vehicle service hours.
- (e) "Passengers per vehicle service mile" means the total passengers divided by the vehicle service miles.
- (f) "Total passengers" means the number of boarding passengers, whether revenue producing or not, carried by the public transportation system.
- (g) "Transit vehicle" means a vehicle, including, but not limited to, one operated on rails or tracks, which is used for public transportation services funded, in whole or in part, under this chapter.
- (h) "Vehicle service hours" means the total number of hours that each transit vehicle is in revenue service, including layover time.
 - (i) "Vehicle service miles" means the total number of miles that each transit vehicle is in revenue service.
- (j) "Vehicle service hours per employee" means the vehicle service hours divided by the number of employees employed in connection with the public transportation system, based on the assumption that 2,000 person-hours of work in one year constitute one employee. The count of employees shall also include those individuals employed by the operator which provide services to the agency of the operator responsible for the operation of the public transportation system even though not employed in that agency.

Community Bridges complies with all of the above requirements except (j) "Vehicle service hours per employee." We will work with the RTPA of Santa Cruz County to create a performance measuring tool to be included in all quarterly and annual reports.

3) Community Bridges should work their respective annual fiscal and compliance auditors to evaluate the transportation related measures required under the TDA, including annual operating costs and revenues.

Community Bridges Lift Line has committed to work with our fiscal and compliance auditors to evaluate the transportation related measures required under the TDA, including annual operating costs and revenues.

Documentation to Include with Your Claim:

All Cla	A letter of transmittal addressed to the SCCRTC Executive Director that attests to the accuracy of the claim and all its accompanying documentation. Statement from the TDA Eligible Claimant indicating its role and responsibilities.

- 4. "Equipment Purchase" in 13/14 is for a brake lathe.
- 5. "Equipment Purchase" in 15/16 is for 7 new vans.

EXHIBIT C-1 Lift Line / CTSA 13/14 OPERATING PLAN

1. Operating Plan

The Lift Line program provides demand responsive, specialized non-emergency health and medical transportation for low-income seniors and disabled residents of Santa Cruz County. Riders are not charged a fare for the service, although donations are accepted. Service is generally provided from 8:00 AM to 4:00 PM, five days a week (with the exception of published holidays), while Lift Line also coordinates additional services on behalf of its clients outside these hours. Service is focused on individuals that live outside the METRO ParaCruz service area, those that are unable to afford the METRO ParaCruz fare, those that do not meet the ADA complementary paratransit eligibility requirements, those needing same day service, and those that need a higher level of service than can be provided by METRO ParaCruz. Lift Line operates a fleet of 17 wheel-chair accessible vans. Transportation is provided to destinations such as doctors' offices, pharmacies, Elderday Adult Day Health Care, Senior Dining Centers, Dialysis Sites and various medical therapy appointments.

In September 2009, Lift Line also took in-house the coordination of the volunteer out-of-county transportation program that provides medical rides to Monterey, Santa Mateo and Santa Clara Counties and beyond. In 2012, Lift Line was awarded two separate Section 5317 grants to hire a dedicated paid staff driver to sustain the out-of-county program, as well as to initiate a same-day transportation pilot program with the addition of another four dedicated drivers. Both projects also share a full-time office assistant to support the expected increase in demand for both these services.

Due to the current demand for service during our peak hours we have been asking our TDA medical clients to increase the potential for grouping rides by booking their medical rides between 10:30am and 1:45 pm. Lift Line has been working closely with local medical facilities to optimize this preferred window of service for this select group of Santa Cruz residents.

Community Bridges maintains comprehensive auto and general liability coverage, including the City of Santa Cruz and SCCRTC as additional insured parties. A copy of each insurance certificate shall be filed with the City and with SCCRTC.

Lift Line is seeking to continue the TDA Medical Rides service and ensure that this service reaches those with the most need. <u>Lift Line projected 6,263 TDA Medical Rides in FY 12/13</u>, including direct service and coordinated taxi rides. At 67% of the 12/13 fiscal year, we are projecting to reach 104% of our goal through the end of the current fiscal year.

Lift Line also coordinates with the local taxi companies to offer the very popular Taxi Scrip (TS) program. <u>Lift Line projected 2,100 Taxi Scrip rides in FY 12/13</u>. At 58% of the 12/13 fiscal year for which data is available, we are projecting to meet 106% of our goal.

This program serves as a safety net service for non-medical rides and rides needed outside the ADA-mandated METRO paratransit service areas. Individuals may purchase subsidized taxi scrip so that they can directly schedule taxi rides, and the majority of taxi vehicles are fully accessible for mobility devices. Currently all of residents that receive the Taxi Scrip at a discount are low income and below the federal 200% poverty level. Lift Line staff continue to update the TDA applications to reflect the new Federal Government poverty level guidelines. Area taxi service

providers include: Deluxe Taxi, Courtesy Cab, and Santa Cruz Yellow Cab. Lift Line provides ongoing monitoring and assessment of the program to ensure that eligibility criteria are met, safety criteria are met by subcontractors, and to ensure there is no abuse of this vital program. The current average cost per trip has decreased from last FY. The average cost per ride is now \$12, thereby increasing the amount of rides that can be taken with the scrip. Currently clients can purchase three \$10.00 books, for a total of \$30.00 worth of scrip, for \$8.00 which would give them approximately one (1) or two (2) rides per book. There is currently a limit to purchase three books per person per quarter.

<u>Lift Line projected 13,667 Meals on Wheels rides in FY 12/13, 6,107 of which were to be funded by TDA funds. At 67% of the year, we are on track to reach 80% of our total goal.</u>

While have not yet met our projected goal for the current fiscal year, historically we have see that demand for Meals on Wheels rides increases in the second half of the fiscal year by up to 18% over the first half. Taking this variable into account, we expect to exceed our 12/13 projection by 3%. Lift Line will continue to coordinate with the Meals on Wheels program to increase attendance at all of the senior dining centers, as Lift Line continues to meet with the Meals on Wheels Program Director and site managers to review unmet transportation service needs.

Lift Line projected to provide 28,322 Elderday rides in FY 12/13, 3,953 or which were to be funded by TDA. At 67% of the fiscal year, we are on track to exceed our 12/13 goal by 12%.

The Elderday program provides day health care to seniors and community residents who need constant care, and/or are diagnosed with dementia or Alzheimer's type of dementia. Almost all of these participants use wheelchairs or walkers, and require vans with lifts. Generally, these clients are very frail, and need personal, door-to-door assistance, reflecting the specialized training that our Lift Line drivers receive. This level of client service is time consuming and labor intensive. We are requesting funds to continue providing service to participants in FY 13/14.

In the past year, Elderday's parent company Salud Para La Gente approach Community Bridges about acquiring the Elderday program under its umbrella and reducing the program's operating costs to keep it afloat. Community Bridges agreed to perform a feasibility study for operating the Elderday program, and is poised to implement it own recommendations. If CB takes this program, Lift Line will have to greatly reduce the cost of transportation to make Elderday a sustainable and viable program. Lift Line is asking for increased TDA funds to support these rides in FY 13/14.

<u>Lift Line projected to provide 3,000 Winter Shelter ISSP program rides in FY 12/13 to be funded by TDA. At this point in the 12/13 fiscal year, Life Line has provided 12,964 rides.</u>

Lift Line/CTSA is requesting TDA funds to match Lift Line costs for providing transportation for the Homeless Service Center's Paul Lee Loft & Winter Shelter Program. This is an Emergency-shelter service that is located on the HSC campus for 46 adults, 365 days per year. The Winter Shelter staff has added a new tracking process to determine disability and age of their participants, and we know that 30% are disabled, 7% are seniors, and there are one to three wheelchair-using participants being transported both ways every day. We are only asking for TDA funds to cover the rides for these senior and disabled participants, while we know that 100% of participants have unmet health care needs. Lift Line is asking for funds to offset the expenses incurred during the Winter Shelter Program that operates November through April of each year, when we provide up to 20,000 rides to the additional shelter provided at the National Guard Armory. This program needs transportation every day and night including all holidays for at least 145 days of the year, and at this point in the fiscal year we are seeing participation is up by 150% over last fiscal year.

Lift Line staff will continue to work with the Santa Cruz County Regional Transportation Commission's Elderly and Disabled Transportation Advisory Committee (E&D TAC) in identifying and addressing unmet needs. In addition, Lift Line continues to work with the E&D TAC in meeting the Unmet Transit and Paratransit Needs as well as the recommendations of the Paratransit Coordination Task Force. For those who don't qualify for METRO ParaCruz or Medical assistance, we will continue to help them complete the required paperwork to make it easier for them to use the current TDA programs that meet their specific needs. In our role as the Coordinated Transportation Service Agency, Lift Line will continue working with other transportation providers to ensure maximum efficiency and coordination.

Lift Line will continue to focus its resources on transportation needs that are not being met by other paratransportation services, such as ADA-mandated METRO ParaCruz. Through TDA funding, Lift Line will continue to serve those not eligible for METRO ParaCruz service, specifically low-income individuals who cannot afford the \$8.00 round-trip METRO ParaCruz copay, those that don't meet the ADA parameters, and those with origins/destinations outside of the METRO ParaCruz service area. Also, because Lift Line provides safety net services to those ineligible or unable to use other services, its goal is to provide flexible programs, scheduling, and dispatching that can respond to the changing needs of medical providers and their clients. Examples include same-day medical services and medical services on weekends.

Equipment Purchase Match

Lift Line/CTSA applied for \$130,000 in 5310 funding to purchase two replacement minivans for the Out-of-County transportation program, as well as to update our fleet's Mobile Data Computers that communicate with our dispatch office to provide real-time information such as directional information and traffic conditions, and even update routes and rides as they as scheduled. The projects selected for funding under the Section 5310 program must be "derived from a locally developed, coordinated public transit-human services transportation plan" (Coordinated Plan) that was "developed through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by members of the public." (Circular, V-5). Community Bridges submitted the FTA Section 5310 Elderly & Disabled Specialized Transit grant application through the Santa Cruz County Regional Transportation Commission to Caltrans. Fortunately they have informed us there is no match dollars need to purchase these vehicles because the Federal Government is offering a Toll Credit of 11.47%.

EXHIBIT E Lift Line / CTSA 13/14 Statement of Role and Responsibility

Community Bridges has been the designated Consolidated Transportation Services Agency (CTSA) since 1982. CTSAs are authorized under California Government Code Sections 15975 and 15950-15952 which were enacted pursuant to the Social Service Transportation Improvement Act. The purpose of the CTSA is to improve transportation required by social service recipients by promoting the consolidation and coordinating of social service transportation. As the Consolidated Transportation Service Agency, Community Bridges Lift Line will continue to coordinate and consolidate transportation services with other transportation and human service agencies in order to provide the most efficient transportation possible. Lift Line will continue to work with Santa Cruz County School Districts, Family and Children's Services of the County of Santa Cruz, County Office of Education, Veterans Service Offices in Santa Cruz and Palo Alto, Hospice of Santa Cruz County hospitals and medical facilities. Community Bridges Lift Line will also continue working closely with the RTPA and to help with the unmet needs identified in the Tri-County AMBAG Coordinated Plan. Community Bridges Lift Line will also continue working with not only local non-profit organizations but with human service and medical facilities in other Counties to continue to define and create an effective mobility management center to help mobilize resident with various disabilities, low income and senior populations to travel easily throughout our County as well as to travel seamlessly throughout our tri-county region, and also to include the Santa Clara County.

As the CTSA, Community Bridges Lift Line will continue coordination to improve and identify the need for specialized transportation equipment. If the equipment is funded through Caltrans 5310 and isn't reaching its proposed requirements through their contract, the equipment can be recaptured and its use coordinated through other identified paratransit service needs. We will continue to offer training to ensure that not only Lift Line staff operates in a safe and sensitive manner but will continue to offer expertise and training for other transportation providers in the County.

Pursuant to the CTSA designation for Santa Cruz County, Community Bridges operates the Lift Line transportation program, which will continue to take a lead, and work closely with the RTPA, to continue to help identify unmet transportation needs, coordinate and provide social service transportation services to low-income seniors, disabled residents, underserved populations and other identified individuals in Santa Cruz County. Lift Line will continue to directly address the issues identified through the unmet needs process by providing rides to medical appointments (including dialysis), alternative care, mental health and various medical transportation needs.

AGENCY BOARD RESOLUTION RESOLUTION #____2013-03-03

At the duly noticed regular meeting of the Community Bridges Board of Directors Governance Committee held on March 8, 2013 the following resolution was made.

Whereas the Board discussed on Community Bridges/Lift Line TDA claim for the 13/14 fiscal year.

Whereas the Board of Directors of Community Bridges (CB) hereby authorizes Community Bridges/Lift Line to make a claim for the 13/14 TDA funds from the Regional Transportation Commission through the City of Santa Cruz.

It is further resolved that the officers and the President/CEO and/or designees are authorized to sign any documents and take any steps necessary to fulfill the intent of this Resolution.

Barbara Frank, President

Rick Roberts, Secretary

VERIFICATION

Each of the undersigned declares under penalty of perjury under the laws of the State of California that the statement in the foregoing certificate are true and correct of his or her own knowledge, and that this declaration was executed on March 8, 2013, at Aptos, California.

REMARKS

MAINTENANCE PROGRAM Cont.

Refer to ASPEN report number CA3BH0001192 through CA3BH0001197 for vehicle inspection information

DRIVER RECORDS

13 CCR 1213(k)(2) Carrier fails to obtain the required information from drivers, used for the first time or intermittently. A motor carrier who uses a driver for the first time or intermittently shall obtain a signed statement giving the total time on duty during the immediate preceding seven days and the time at which the driver was last relieved from duty prior to working for the motor carrier. Drivers Borba and Escobar both worked for other motor carriers and Community bridges did not request the required information prior to utilizing the services of each driver. Drivers with secondary employment and part time drivers that are employed outside this carrier are also required to provide this information.

Other then noted violations, Carrier was found to be in compliance and a terminal safety compliance rating of satisfactory has been assigned.

The following documents were reviewed during this inspection.

- 1. Drivers time keeping records
- 2. Drivers DMV pull notice records
- 3. Drivers daily vehicle inspection reports
- 4. Drivers proficiency records
- 5. Vehicle maintenance and repair records

New sponsor rescues Elderday: Community Bridges takes over adult day health care center from Salud

By Donna Jones Santa Cruz Sentinel

Posted: 04/30/2013 06:30:54 PM PDT

SANTA CRUZ – The Lift Line vans started rolling into the parking lot on Pioneer Street about 10 a.m. Tuesday, and continued for the next 30 minutes or so, dropping off dozens of seniors, many using walkers or riding in wheelchairs.

Elderday staff rushed out to greet the arrivals, escorting them one by one into the adult day health care center.

For the next four to five hours, the staff would monitor medical conditions, dispense medications, oversee physical and occupational therapies, and serve snacks and lunch. For 120 mostly elderly clients with physical or mental impairments, the center is a lifeline that has kept them out of nursing homes.

It was almost snatched away due to state budget cuts. But after years of financial uncertainty, Elderday's future appears more secure after a transfer of the program from Salud Para La Gente to Community Bridges in April.

"We've been through so much, and were afraid we were going to close," said social worker Manuel Coto. "We're just thankful Community Bridges stepped in."

Sam Storey, the nonprofit's chief executive officer, described the move as a "homecoming."

Community Bridges sponsored the program for more than two decades, starting in 1982. But Storey sald, like most nonprofit programs, Elderday ran on a "shoestring," and in 2004 Community Bridges handed off the program to Salud, which qualified for a higher Medi-Cal reimbursement rate.

"We were always just trying to make that budget work year to year," Storey said. "We were getting \$68 (a day per Medi-Cal client) back then. Salud was able to get \$106. That was our principal motivation."

At peak funding, Salud was receiving \$120 per client per day, but then the state budget crisis hit. Eligibility criteria was tightened and the state slashed the reimbursement rate to \$76. Across California, adult centers began to close. In November, facing a \$200,000 shortfall, Salud's board considered closing Elderday, but held off to explore other options.

Marc Pimentel, president of Salud's board, said Elderday's financial pressures were putting the nonprofit's core health programs at risk.

"All of our intentions, first and foremost, was to maintain services," Pimentel said. "That was our primary goal, and Salud was not going to be able to maintain them."

That's when talks began with Community Bridges. Because the nonprofit also operates Lift Line, it was able to realize some savings in administrative efficiency. Elderday's landlord, Ow Family Properties, agreed to reduce the rent.

But the shift hasn't been painless. Coto and other staff members saw their hours and wages cut, representing as much as a 30 percent loss in income, Storey said. Despite the hardship, few workers elected to leave.

Coto, the social worker, and his co-workers talked about how much the program means to participants, how attached they are to their clients.

Coto, a father of two, said the pay cut hurt, and his family will have to cut back. But he wants to stay. The important thing, he said, is services have remained the same.

"I took the hit, and am going to see if I can stand," Coto said. "I'm a little wobbly."
