Active Transportation: Coastal Rail Trail Segment 5

Project Description
The Coastal Rail Trail Segment 5 (as defined in the Monterey Bay Sanctuary Scenic Trail {MBSST} Network Master Plan) proposes to construct 7.5 miles of the MBSST’s rail trail spine between Wilder Ranch and Davenport. The existing facility is along the publicly-owned railroad right-of-way. Segment 5 would be a new multi-use paved path with striping, parallel unpaved path and shoulder, and parking improvements along the scenic North Coast in Santa Cruz County.

The goals of this project are to provide an accessible bicycle and pedestrian path adjacent to the rail right-of-way for active transportation, recreation, coastal viewshed appreciation, and environmental/cultural education along the existing rail corridor, consistent with the MBSST Network Master Plan. When constructed, this project will be one portion of the planned 32-mile rail trail network that traverses the entire coastline of Santa Cruz County.

Project Highlights
- ADA-accessible trail that maximizes ocean views and scenic coastal vistas along historical and agricultural landscapes
- 7.5-mile continuous paved bicycle and pedestrian trail connecting Wilder Ranch to Davenport
- Provides car-free alternative access to numerous beaches and recreational facilities along the coast
- Links to existing and future trails (such as Wilder Ranch, San Vicente Redwoods, Cotoni-Coast Dairies, etc.) creating bike/pedestrian access from the City of Santa Cruz to Davenport
- Safety and mobility improvements along a scenic portion of the County adjacent to Highway 1 with the addition of two new parking lots and improvements to a third, restrooms, and a pedestrian crossing in Davenport

Project Delivery Strategy
In partnership with the Federal Highway Administration (FHWA) - Central Federal Lands (CFL), the RTC is leading the project delivery. The RTC completed the Environmental Impact Report for the entire 7.5 mile-long Segment 5 project. The RTC is using Measure D, Federal Lands Access Program (FLAP), Coastal Conservancy, and Land Trust of Santa Cruz County funds to leverage other potential grant opportunities. CFL is completing the federal environmental clearance and leading the design of the entire 7.5-mile segment. The RTC is leading the acquisition of any right-of-way needed for the project. Although CFL will lead the construction phase, there is currently only enough funding to complete construction of the southerly 5.4 miles, from Wilder Ranch to Panther/Yellowbank Beach. If needed, this project will be phased. The RTC has applied for a $6 million Proposition 68 Grant from the Natural Resources Agency and will continue to investigate other state and federal grant opportunities to complete the construction funding plan. The RTC has dedicated funding for the Davenport crosswalk, which can be separated and advanced early, once Caltrans approvals are received.

**Project Status/Schedule**

The RTC completed the Environmental Impact Report in 2019. CFL is scheduled to complete the federal environmental document by 2020, with final design expected in 2021. The first phase of the project is scheduled to go to construction in 2021, with the second phase (Panther/Yellowbank Beach to Davenport) dependent on Caltrans permits and construction funding.
