

REDEFINING URBAN MOBILITY

Glydways is a public transit solution that unlocks an exceptional rider experience our communities can count on for decades to come.

Leveraging mature technologies to improve the way people move across our urban landscapes, Glydways is committed to improving people's quality of life with the best transit experience, while bringing more accessibility and opportunity simultaneously.

As an Automated Transit Network (ATN) which operates only on dedicated guideways, Glydways **moves riders direct-to-destination, with no stops in-between.** Sharing a ride is not required and can be a personalized journey. Glydways believes that such a revolutionary transit experience will create demand for more transit usage as well as strong ridership retention.

Low to High Capacity

- 100's to 10,000+ Passengers Per Hour, Per Direction
- Ridership Scalability Based on Utilization

Sustainable Project Delivery

- Fractional Footprint, GHG Emissions, and Costs to Build and Operate
- Traditional or Progressive Project Delivery Options (PDB, P3)
