2. Which do you **least** use in your current work, and why?

(for example, not relevant, not granular enough, disaggregated data isn't available, have access to the data via another source that provides more detail, etc.)

Impact 1:
Increased **resilience of children and youth**

Impact 2:
Increased **resilience among adults**

Impact 3:
Increased **resilience among older and dependent adults**

COMMUNITY-LEVEL INDICATORS*

- Impact 1:**
- a) Experiences with childhood trauma (parent report)
 - b) Social-emotional regulation
 - c) Developmental assets
 - d) Levels of school connectedness
 - e) Child abuse and neglect
 - f) Out-of-home placement rates

- Impact 2:**
- a) Reports of adverse experiences during childhood (adult retrospective)
 - b) Access to counseling/support for healing
 - c) Parental confidence
 - d) Self-reported health and well-being

- Impact 3:**
- a) Adults aged 60+ successfully aging in place
 - b) Geographic isolation (living alone and/or distance from essential resources)
 - c) Self-reported health and well-being (depression, loneliness, etc)
 - d) AARP Livability Index
 - e) Older & dependent adult abuse and neglect
 - f) Crimes against older & dependent adults (fraud)
 - g) Access to affordable, ADA-accessible and appropriate transportation
