Executive Summary
The State Route (SR) Highway 1 Auxiliary Lanes and Bus-on-Shoulder Improvements Project (Project), Freedom Boulevard to State Park Drive and Coastal Rail Trail Segment 12, is being proposed by the California Department of Transportation (Caltrans) in cooperation with the Santa Cruz County Regional Transportation Commission (SCCRTC) and the County of Santa Cruz. The Project proposes to widen SR 1 to include auxiliary lanes and accommodate bus-on-shoulder (BOS) operations between the Freedom Boulevard and State Park Drive interchanges and to construct the Coastal Rail Trail (Segment 12) along the existing railroad tracks route in Santa Cruz County (County), California. This report presents the results of the Initial Site Assessment (ISA) conducted for the Project, along approximately 2.6 miles of SR 1 and 1.14 miles of trail along the SCCRTC-owned Santa Cruz Branch Rail Line (SCBRL) between State Park Drive and Rio Del Mar Boulevard, in the unincorporated communities of Aptos, Rio Del Mar, Seacliff, and Aptos Hills- Larking Valley.

The purpose of this Project is to reduce congestion along SR 1 through the Project limits, enhance bicycle and pedestrian connectivity along Segment 12 of the Coastal Rail Trail, promote the use of alternative transportation modes to increase transportation system capacity and reliability, and provide Coastal Rail Trail access across SR 1 at two railroad bridges.

As part of the environmental due diligence for the Project, the SCCRTC has directed its consultants, Mark Thomas & Company, Inc. via subcontractor WRECO, to complete an ISA for the Project. The purpose of the ISA is to assess the potential risks posed by hazardous materials within the Project limits to environmental resources and human health. This report presents the results of the ISA, including regulatory records searches, file reviews, historical database reviews, and a site reconnaissance, along with our recommendations.

According to historical research and records, the Project area was utilized for agriculture from the early 1940s to mid- to late 1950s, when residential and commercial development began. By the mid-1960s, the Project area consisted of commercial and residential properties with some open space. Most of the land surrounding the Project limits has been developed with a mixture of residential and commercial properties.

The ISA identified the following potential recognized environmental conditions (REC) including:

- Historical agricultural practices (pesticides and metals) could have potential impact on subsurface soil within the Project limits;
- Potential for aerially deposited lead (ADL) in exposed soil along the roadways from historical vehicle emissions during the leaded gasoline era;
- Potential petroleum hydrocarbons in soil and groundwater from leaking underground storage tank (LUST) sites in proximity to (and upgradient) of the Project limits;
- Potential volatile organic compounds (VOC) from drycleaner sites in proximity to (and upgradient) of the Project limits;
- Utility poles along the frontage roads and bridges crossing SR 1 have pole-mounted transformers, which may contain polychlorinated biphenyls (PCB), and treated wood poles may contain metals and polyaromatic hydrocarbons (PAH);
- The former railroad corridor has the potential of heavy metals, semi-volatile organic compounds (SVOC), PAHs, and PCBs in soil;
- Potential lead-based paint (LBP) in the traffic striping on the highway, the Rio Del Mar Boulevard overcrossing bridge, and Railroad Bridges over SR 1; and
- Potential asbestos-containing materials (ACM) within the concrete portions of the Rio Del Mar Boulevard overcrossing and railroad bridges over SR 1.

The RECs identified from the ISA and recommended actions are summarized below.

### Summary of RECs and Recommendations

1 INTRODUCTION

The State Route (SR) Highway 1 Auxiliary Lanes and Bus-on-Shoulder Improvements Project, Freedom Boulevard to State Park Drive and Coastal Rail Trail Segment (Project) is being proposed by the California Department of Transportation (Caltrans) in cooperation with the Santa Cruz County Regional Transportation Commission (SCCRTC) and the County of Santa Cruz. The Project proposes to widen State Route (SR) 1 to include auxiliary lanes and accommodate bus-on-shoulder (BOS) operations between the Freedom Boulevard and State Park Drive interchanges and to construct the Coastal Rail Trail Segment 12 in Santa Cruz County, California. This report presents the results of the Initial Site Assessment (ISA) conducted for the Project, along approximately 2.6 miles of SR 1 and 1.14 miles of trail along the SCCRTC-owned Santa Cruz Branch Rail Line (SCBRL) between State Park Drive and Rio Del Mar Boulevard in the unincorporated communities of Aptos, Rio Del Mar, Seacliff and Aptos Hills-Larking Valley. The Project Location Map and Vicinity Map are shown in Figure 1 and Figure 2, respectively.

1.1 Project Description

Caltrans, in cooperation with the SCCRTC and the County of Santa Cruz, proposes to widen SR 1 to include auxiliary lanes, accommodate BOS operations between the Freedom Boulevard and State Park Drive interchanges, and construct Coastal Rail Trail Segment 12.

One build alternative and the no-build alternative are proposed for further consideration. The Project is located in Santa Cruz County on SR 1 from post mile (PM) 8.1, south of Freedom Boulevard, to PM 10.7, north of State Park Drive, with 1.14 miles of trail along the SCCRTC-owned SCBRL between State Park Drive and Rio Del Mar Boulevard. The total length of the Project on SR 1 is 2.6 miles, and on the SCBRL is 1.14 miles. Within the limits of the proposed Project, SR 1 is a controlled access freeway with two 12-foot lanes; shoulder width varies within Project limits. The average width of the inside shoulders is approximately 5 feet, and the average width of the outside shoulders is approximately 10 feet. Within the Project area, the existing railroad right-of-way is generally in the range of 40 to 55 feet wide, with the existing railroad tracks generally in the center of the right-of-way. The existing railroad has at-grade crossings at State Park Drive, Aptos Creek Road, and Trout Gulch Road, with bridges over SR 1 at two locations, Soquel Drive, Aptos Creek and Valencia Creek, and crosses under Rio Del Mar Boulevard. The SCBRL is currently an active freight railroad. Figure 3, Figure 4, and Figure 5 show the Project components.
Figure 1. Project Location Map

Source: ICF, 2021
Figure 2. Project Vicinity Map

Source: WRECO, 2022
1.1.1 Purpose and Need

The purpose of the Project is to do the following.

- Reduce congestion along SR 1 through the Project limits.
- Enhance bicycle and pedestrian connectivity along Segment 12 of the Coastal Rail Trail.
- Promote the use of alternative transportation modes to increase transportation system capacity and reliability.
- Provide Coastal Rail Trail access across SR 1 at the two railroad bridges.

This Project is needed for the following reasons.

- Several bottlenecks along SR 1 in the southbound and northbound directions cause congestion during peak hours, significantly delaying drivers.
- Cut-through traffic, or traffic on local streets, is increasing because drivers are seeking to avoid congestion on SR 1.
- There are limited opportunities for pedestrians and bicyclists to safely cross SR 1 and navigate the Project corridor, even though portions of the Project area are designated as regional bicycle routes.
- There are insufficient incentives to increase transit service in the SR 1 corridor because congestion threatens reliability and cost-effective transit service delivery.

1.1.2 Project Alternatives

1.1.2.1 Build Alternative

1.1.2.1.1 Auxiliary Lanes

Auxiliary lanes are designed to improve merging operations and reduce conflicts between traffic entering and exiting SR 1 by connecting the on-ramp of one interchange to the off-ramp of the next; they are not designed to serve through traffic. A southbound auxiliary lane and a northbound auxiliary lane would be added to the following segments of SR 1.

- Between the Freedom Boulevard and Rio Del Mar Boulevard interchanges.
- Between Rio Del Mar Boulevard and State Park Drive interchanges.

The total roadway widening would be approximately 2.6 miles in length. Southbound, the auxiliary lanes would begin at the existing State Park Drive loop on-ramp and end at the existing off-ramp to Freedom Boulevard. Northbound, the auxiliary lanes would begin at the existing Freedom Boulevard on-ramp and end at the existing diagonal off-ramp to State Park Drive.
The new auxiliary lanes would be 12 feet wide. From Freedom Boulevard to Rio Del Mar Boulevard, the width needed for the new lane would be added in the median. The existing median barrier would be reconstructed in its current location. From Rio Del Mar Boulevard to State Park Drive, the width needed for the new lane would be added outside the existing shoulders; the outside shoulders would be standard 10 feet wide.

Moosehead Drive to the south of SR 1, south of Aptos Creek, would be realigned where it runs parallel to SR 1 due to the outside widening of SR 1. A new retaining wall would be placed along the outside freeway shoulder to support the realignment that would include horizontal and vertical adjustments.

1.1.2.1.1.1 Structures – State Route 1
The Build Alternative would include the replacement of the two Santa Cruz Branch Line railroad bridges over SR 1 and widening of the SR 1 bridge over Aptos Creek and Spreckels Drive to accommodate the proposed auxiliary lanes. The existing two-span Santa Cruz Branch Line railroad bridges (underpass structures) are proposed to be replaced with longer spans to accommodate the planned SR 1 ultimate improvements that are a six-through-lane concept plus an auxiliary lane in each direction between interchanges. The ultimate SR 1 configuration was approved in the Final Environmental Impact Report/Environmental Assessment with a Finding of No Significant Impact for the Tier I High Occupancy Vehicle (HOV) Lanes and Tier II 41st Avenue to Soquel Avenue/Drive Auxiliary Lanes Project (Tier I/Tier II Final EA/EIR/FONSI). In addition to the railroad bridges, new trail overcrossings would be constructed adjacent to the new railroad bridges for the ultimate trail configuration of the Coastal Rail Trail Segment 12 for the SR 1 improvements.

The widening of the SR 1 bridge over Aptos Creek and Spreckels Drive would occur on the south side of SR 1 only and require abutment walls along the existing embankments along the south side of Aptos Creek and the embankment on the north side of Spreckels Drive. The widened bridge would accommodate six lanes, each 12-feet wide (four through-lanes plus an auxiliary lane in each direction), 10-foot-wide outside shoulders, and a 9-foot-wide median with a 2-foot-wide inside shoulder in the northbound direction and 5-foot-wide inside shoulder in the southbound direction. To accommodate the SR 1 ultimate improvements of six through-lanes plus an auxiliary lane in each direction, the SR 1 bridge over Aptos Creek and Spreckels Drive would be widened to the north (inland) side as part of a future project.

1.1.2.1.1.2 Retaining Walls – State Route 1
The build alternative would include retaining walls at the following locations along SR 1 (Figure 3 through 5).

Northbound
- “SR1” Station 258+90 - 261+26; max height = 15 feet
- “SR1” Station 288+07 - 296+00; max height = 15 feet

Southbound
- “SR1” Station 258+55 - 263+01; max height = 20 feet
• “SR1” Station 265+55 - 268+56; max height = 12 feet
• “SR1” Station 269+71 - 270+70; max height = 12 feet
• “SR1” Station 273+20 - 277+02; max height = 20 feet
• “SR1” Station 277+02 - 278+98; max height = 30 feet
• “SR1” Station 281+56 - 284+41; max height = 35 feet
• “SR1” Station 284+41 - 296+45; max height = 15 feet

The build alternative would evaluate sound walls at the following locations along SR 1 (Figure 4).

Northbound
• “SR1” Station 258+57 – 267+49

Southbound
• “SR1” Station 263+18 – 266+78
• “SR1” Station 267+31 – 272+50
• “SR1” Station 284+79 – 291+52

1.1.2.1.2 Bus-on-Shoulder Features

BOS features are proposed, which would allow future bus operations on the outside shoulders of SR 1 through the interchanges during peak congestion periods. At the Freedom Boulevard, Rio Del Mar Boulevard, and State Park Drive interchanges, the Project would widen and improve SR 1 shoulders, which currently lack the width and pavement structural section to support bus operations.

1.1.2.1.2.1 Cross Section – State Route 1 Bus-on-Shoulder

The added auxiliary lanes coupled with the BOS improvements allow the transit operator to use the auxiliary lane in between interchanges and use the shoulder between the off-ramp and on-ramps through the interchanges. Within the Freedom Boulevard, Rio Del Mar Boulevard, and State Park Drive interchange areas, the highway shoulders would be 12 feet wide.

1.1.2.1.2.2 Other Features – State Route 1 Bus-on-Shoulder

New signs would be installed to advise motorists that only buses are allowed to use the highway shoulders through interchanges during peak traffic hours. Along northbound SR 1, a sign would be provided south of each of the three interchanges in the Project area. Along southbound SR 1, a sign would be installed north of each interchange. Shoulders would be painted red to indicate bus-only use.

1.1.2.2 Coastal Rail Trail Segment 12

The limits of Coastal Rail Trail Segment 12 extend from the southern terminus of the trail segment at Sumner Avenue, just of the south of the Rio Del Mar Boulevard underpass, to the northern terminus at State Park Drive. The proposed Coastal Rail Trail Segment 12 includes the construction of a paved bicycle and pedestrian shared use trail within the SCBRL right-of-way on the inland side of the tracks, consistent with the approved Monterey Bay Sanctuary Scenic Trail (MBSST) Network Master Plan (MBSST Network Master Plan) (Figure 6), with an optional first phase. The trail segment would include a new at-grade trail connection to Sumner Avenue just south of the Rio Del Mar Boulevard underpass where the existing railroad tracks pass under Rio Del Mar Boulevard and a new sidewalk on the north side of Sumner Avenue between the terminus of the trail and the existing sidewalk on Rio Del Mar Boulevard.
The SCCRTC wishes to preserve the SCBRL corridor for transportation uses, which includes recreational passenger rail, freight rail, a multiuse trail, and future commuter rail transit. The ultimate configuration to accommodate all proposed transportation uses along the SCBRL is a bicycle and pedestrian shared use trail adjacent to railroad tracks. The SCBRL is currently an active freight railroad with SCCRTC owning the right-of-way. SCCRTC contracts to serve freight and recreational passenger rail along the freight easement. The SCCRTC’s contracted freight operator has indicated that they may file for abandonment of freight along the SCBRL.

As a method of preserving the right-of-way of a corridor that otherwise could be abandoned, the SCCRTC could consider railbanking the corridor. The Department of Interior defines railbanking as the preservation of a railroad corridor for future rail use. Railbanking is accomplished under the National Trails System Act through provisions that allow a railbanked corridor to be used for interim trail use purposes through a voluntary agreement reached between a railroad and a trail manager. The right-of-way is preserved for future freight reactivation and could allow the removal of the railroad tracks and construction of a trail in the interim condition.

For this reason, an optional first phase is being considered for Segment 12 of the Coastal Rail Trail, where all or a portion of the trail could be located along the alignment of the existing railroad tracks.

1.1.2.2.1 Ultimate Trail Configuration

1.1.2.2.1.1 Trail Alignments
The ultimate trail configuration includes construction of a paved bicycle and pedestrian shared use trail alongside the existing railroad track alignment. New trail bridge crossings of SR 1 at two locations and adjacent to the existing railroad bridges at Soquel Drive, Aptos Creek, and Valencia Creek would be constructed. New at-grade trail crossings will be constructed at Aptos Creek Drive,
Parade Street, and Trout Gulch Road. An at-grade trail connection from the new trail to the Aptos Village County Park between Aptos Creek and Aptos Creek Road would be constructed.

1.1.2.2.1.2 Structures

- At the two locations where the existing railroad bridges cross over SR 1, the Rail Trail will be placed adjacent to the reconstructed rail underpasses.

- Where the Rail Trail crosses over Aptos Creek, Valencia Creek and Soquel Drive, the existing structures have been evaluated for their load bearing capacities, and it has been determined there is not enough data to cantilever the Rail Trail. Therefore, the Project would include construction of new Rail Trail bridges adjacent to the existing railroad structures.

- For areas where the Rail Trail is on an independent structure from the railroad bridges or grade, the separation between the two structures would be a minimum of 5 feet.

1.1.2.2.1.3 Retaining Walls

Retaining walls would be constructed in the following locations for the Coastal Rail Trail Segment 12 alignment.

- North of SR 1 (towards State Park Drive) – An approximate 6-foot high, 300-foot long retaining wall on the inland side of the trail.

- SR 1 to Soquel Drive—Retaining wall varying in height between approximately 5-feet and 20-feet, approximately 300-feet long on the inland side of the trail.

- Aptos Creek to Aptos Creek Road—Retaining wall varying in height between approximately 2-feet and 18-feet, approximately 400-feet long on the inland side of the trail.

- Trout Gulch Road to Valencia Creek—Retaining wall varying in height between approximately 2-feet and 18-feet, approximately 450-feet long on the inland side of the trail.

- South of SR 1 (towards Rio Del Mar Boulevard)—An approximate 12-foot-high, 400-foot long retaining wall on the inland side of the trail.

- Under Rio Del Mar Boulevard - Retaining wall varying in height between approximately 4-feet and 16-feet, approximately 1,000-feet long on the inland side of the trail.

1.1.2.2.1.4 Fencing

Fencing to separate trail users and the railroad for the ultimate trail improvements is proposed as shown in Figure 6. In accordance with the Federal Railroad Administration guidelines, there would be a 10-foot offset from the centerline of the railroad to the edge of the trail, although an 8-foot- and 6-inch offset from the centerline of the railroad may be allowed in some circumstances. The
fencing would be constructed using concrete posts (4 feet and 6 inches in height) etched to resemble wood, and multiple smooth wire strands. Fence post construction is anticipated to require 3-foot-deep excavation. The new trail bridges over Aptos Creek, Valencia Creek, and Soquel Drive would include a railing.

1.1.2.2.2 Construction of Optional First Phase for Coastal Rail Trail Segment 12

It is possible that the common carrier could file for abandonment of freight operations with the STB along the SCBRL at any time, in which case all or a portion of the SCBRL would likely be railbanked to preserve the corridor for future freight re-activation but could then be used for a multiuse trail as an interim condition.

All or a portion of the trail would be constructed in approximately the same location of the existing railroad tracks by removal of the rails and ties from just south of Rio Del Mar Boulevard at the southern terminus with Sumner Avenue to the northern terminus at State Park Drive, as shown in Figure 7. The two existing railroad bridges over SR 1 would be removed and two new trail overcrossings over SR 1 would be constructed in their place. The existing railroad bridges at Aptos Creek and Valencia Creek/Soquel Drive (south) would be repurposed for the new trail by removing the railroad decking and replacing with a new trail deck and railing system. The existing single span railroad bridge superstructure over Soquel Drive (north) would be removed and replaced with a new trail deck and railing system.

Figure 7. Coastal Rail Trail Segment - Optional First Phase

Source: ICF, 2021
Stair access between the new trail and existing Soquel Drive (north) is proposed. A stair connection from the trail to Soquel Drive would begin on the south side of the trail west of the existing railroad bridge over Soquel Drive with a terminus at the Soquel Drive/Spreckels Drive signalized intersection. A new crosswalk would be provided at the Soquel Drive/Spreckels Drive signalized intersection. All trail users can access Soquel Drive via the at-grade trail crossing with Aptos Creek Road as an alternative to using the stairs. The alternative route would be identified with new signage. An at-grade trail connection from the new trail to the Aptos Village County Park between Aptos Creek and Aptos Creek Road would be constructed.

New at-grade trail crossings will be constructed at Aptos Creek Drive, Parade Street, and Trout Gulch Road in the approximate location of the existing railroad tracks.

1.1.2.2.2.1 Structures
- At the two locations where the existing railroad bridges cross over SR 1, the existing railroad bridges would be removed, and new single-span trail overcrossings would be constructed over SR 1 in the same general location as the existing railroad bridges. The bridge abutments constructed on either side of Highway 1 would be constructed to freight railroad standards and be positioned and sized to account for the ultimate trail configuration.
- Where the trail crosses over Aptos Creek, Valencia Creek, and Soquel Drive (south), the existing bridge structures would remain, the railroad tracks removed, and new trail constructed along the existing rail centerline.
- The existing single span railroad bridge superstructure over Soquel Drive (north) would be removed and replaced with a new trail deck and railing system.
- Slight modifications of the existing railroad bridge abutments are proposed to meet current seismic requirements.

1.1.2.2.2 Retaining Walls
Retaining walls would be constructed in the following locations:
- Just west of Soquel Drive - An approximate 5-foot high, 60-foot long retaining wall on the south side of the trail.
- Just east of Aptos Creek —An approximate 18-foot high, 140-foot long retaining wall on the south side of the trail and an approximate 6-foot high, 140-foot long retaining wall on the inland side of the trail.

1.1.2.2.3 Fencing
The new trail overcrossings over SR 1 would include railings with fencing and the repurposed bridges over Aptos Creek, Valencia Creek, and Soquel Drive would have fencing added. No additional fencing is anticipated due to the railroad tracks being removed.
1.1.2.2.3 Removal of Optional First Phase for Coastal Rail Trail Segment 12

If all or a portion of the optional first phase of the trail is implemented, the trail along the existing railroad track alignment would need to be removed, a trail would be constructed adjacent to the tracks as described by the proposed ultimate trail Project, and the railroad tracks re-installed in their approximate existing location. At-grade railroad crossings of Aptos Creek Drive, Parade Street, and Trout Gulch Road would need to be reconstructed.

1.1.2.2.3.1 Structures

- At the two locations where new trail overcrossings are constructed over SR 1 as part of the optional first phase improvements, the trail overcrossings would be relocated to be adjacent to the existing railroad alignment, and new railroad bridges would be constructed over SR 1 adjacent to the trail overcrossings, as described by the ultimate trail configuration. Construction of the new two-span railroad bridges over SR 1 would require the construction of support columns in the median of SR 1 to support the new railroad bridges.
- Repurpose bridges over Soquel Drive (south), Aptos Creek, and Valencia Creek from trail use to rail use by removing the trail deck and railing system and reconstructing railroad infrastructure.
- The trail deck and railing system over Soquel Drive (north) would be removed and replaced with a single span railroad bridge with reconstructed railroad infrastructure.

1.1.2.2.4 Design Standards

Coastal Rail Trail Segment 12 would be designed as a multi-use paved path per the guidelines identified in Chapter 5 of the Monterey Bay Sanctuary Scenic Trail (MBSST) Master Plan. The design standards used for this segment of the Coastal Rail Trail follow the MBSST guidelines and are listed under Cross Section Standards. The MBSST Network Master Plan incorporates and refers to design elements from the Class I Bikeways identified in Chapter 1000 of the Highway Design Manual.

In areas where existing constraints limit the available width for the trail to be adjacent to the railroad tracks, other alternative design standards than those listed in the MBSST Master Plan may be utilized for design.

1.1.2.2.4.1 Cross Section Standards

- The paved traveled way of the Coastal Rail Trail would be a minimum of 12 feet wide but may be reduced to 10 feet in areas with existing constrained conditions.
- Shoulders would be provided on each side of the traveled way and would be 2 feet in width where possible.
- For accessibility and drainage, the cross slope of the traveled way would be between 1% and 2%.
- The shoulder cross slope would be between 2% and 5% and would angle away from the surface of the traveled way.
1.1.2.2.4.2 Horizontal Design

- The design speed for the trail would be established at 20 miles per hour and correlates to a minimum stopping sight distance of 125 feet.
- To meet a minimum stopping sight distance of 125 feet, a radius of no less than 500 feet would be used for the Coastal Rail Trail alignment where possible.
- The minimum horizontal clearance between the railroad centerline and the edge of the Coastal Rail Trail, inclusive of shoulders, is 8 feet, 6 inches.
- Where roadways are adjacent to the trail, such as Soquel Drive through Aptos Village, a minimum horizontal separation of 12 feet on tangents and 10 feet on curves is recommended between edge of pavement of the roadway and edge of the trail. This standard would be modified at constrained locations along the corridor where necessary to maintain the absolute minimum horizontal separation. Such separation variances may include vertical separation, fence, or other barriers.

1.1.2.2.4.3 Vertical Design

- The vertical grade slope for the Coastal Rail Trail would be limited to no more than 5%.
- Vertical obstructions and signs would be 10 feet above the entire Coastal Rail Trail, except in limited situations where the vertical clearance may be reduced to 8 feet over the travel way and 7 feet over the shoulders.
- The Coastal Rail Trail would either be constructed following closely the existing grade or on widened segments and new bridges requiring new cuts/fills and retaining walls. Minor grading of the existing ground surface in segments on existing grade is anticipated and may involve excavation of approximately one-foot depth.

1.1.2.3 Vegetation Removal and Planting

Construction work for the Build Alternative would require removal of existing mature landscape plantings along SR 1 and along the Coastal Rail Trail Segment 12 route. Where proper setback requirements allow, plantings would be replaced as per Caltrans’ policies, and include an automated irrigation system and a 3-year plant establishment period. The replacement planting effort would include vegetation impacted by the contractor’s staging, storage, and construction activities. Vegetation needed for the optional first phase trail improvements is significantly less than for the ultimate trail improvements.

1.1.2.4 Construction Activities

Construction work for the Build Alternative would be done primarily during daylight hours from 7:00 a.m. to 6:00 p.m. However, night-time work and temporary closures of lanes and roadways may be necessary to avoid major disruption for tasks that could interfere with traffic or create safety hazards such as demolition of the existing railroad bridges. Construction activities would include excavation, drilling, dewatering, pavement demolition, bridge demolition, mass grading, concrete form work, pavement installation, storm system installation, landscaping and irrigation, sign installation, striping operations, and traffic control. Such activities would require the use of the following types of equipment: drilling rig, forklift, scissor lift, backhoe, track excavator, compactor, concrete pump, crane, bulldozer, grader, front-end loader, dump trucks, jackhammer,
and vibratory roller. These activities may require temporary freeway, ramp, and local street partial lane closures or full closures with possible detours.

A Transportation Management Plan (TMP) would be developed as part of the Project construction planning phase. The TMP would address potential impacts to circulation of all modes of travel (i.e., transit, bicycles, pedestrians, and vehicles). Roadway and/or pedestrian access to all occupied businesses and respective parking lots would be maintained during Project construction. The TMP would include an evaluation of potential detour impacts and would also include measures to minimize, avoid, and/or mitigate impacts to alternate routes. The TMP would address coordination with local agencies for traffic through or near the construction zone. Staging areas would be located within the existing Caltrans right-of-way and within the SCBRL right-of-way along Coastal Rail Trail Segment 12.

1.1.2.4.1 Construction Schedule

Construction of the SR 1 and Coastal Rail Trail improvements including the auxiliary lanes and BOS features is anticipated to begin in 2025 subject to availability of funds for construction and is estimated to take approximately 3 years to complete.

1.1.2.4.2 Demolition

Demolition work would generally comprise removal of existing bridge structures, abutments, columns, overhead sign foundations, rails and ties, clearing and grubbing, tree removal, pavement removal, and drainage system removal.

1.1.2.5 Stormwater Drainage and Treatment Facilities

Permanent impacts from runoff from the increased impervious surface area could have the potential to increase in pollutants to the receiving water bodies. Erosion control measures such as hydroteeading and erosion control blankets will be applied on all DSAs to minimize post-construction erosion. Reducing pervious areas could also reduce the amount of rainfall that is able to percolate into the water table. Therefore, the Project will consider treatment best management practices (TBMP) and hydromodification measures to reduce these impacts.

1.1.2.6 Utilities

Existing utilities located in areas subject to construction that conflict with the proposed improvements would be relocated as needed. This is anticipated to include sanitary sewer and electric utility poles adjacent to Moosehead Drive and a gas line along the Coastal Rail Trail Segment 12 route for the ultimate trail improvements, and other utility appurtenances.

1.1.2.7 Property Acquisition

The Build Alternative would require full or partial acquisitions for the construction of the SR 1 and Coastal Rail Trail Segment 12 ultimate trail improvements, as well as temporary easements for construction activities such as the construction of sound walls and retaining walls along SR 1 and the SCBRL.

Table 1 lists the full and partial property acquisitions that would occur under the Build Alternative.
Along the SCBRL corridor, the acquisitions shown below would be needed for the construction of the proposed ultimate trail configuration of Coastal Rail Trail Segment 12. No new property acquisitions would be needed to construct the optional first phase of the Coastal Rail Trail Segment 12, however the Surface Transportation Board (STB) would have to approve railbanking the corridor.

a During final design, partial acquisition of parcel numbers 039-232-01, 039-232-02, and 039-232-03 may be determined to be feasible, in which case, the respective amounts shown in the “Partial Acquisition” column of Table 1 would be acquired. In the event that it is determined during final design that partial acquisition is infeasible, the respective amounts shown in the “Full Acquisition” column of Table 1 would be acquired.

Source: ICF, 2021

1.1.3 No-Build Alternative

Under the No-Build Alternative, there would be no construction of auxiliary lanes or BOS features on SR 1 within the Project area, and Coastal Rail Trail Segment 12 would not be constructed. The existing transportation facilities within the Project area would remain unchanged. The No-Build Alternative assumes the construction of other planned and programmed projects in the region, including other auxiliary lanes projects on SR 1 and other segments of the Coastal Rail Trail.

1.2 Purpose of Initial Site Assessment

As part of the environmental due diligence for the Project, the SCCRTC has directed its consultants, Mark Thomas & Company, Inc. via subcontractor WRECO, to complete an ISA for the Project. The purpose of the ISA is to assess the potential risks posed by hazardous materials within the Project limits to environmental resources and human health. The ISA was required as
The industry standard for preparing an ISA is found in the American Society of Testing and Materials (ASTM) International E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (E1527-21 is pending EPA approval). The ISA was conducted in accordance with the United States Environmental Protection Agency’s (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312). The AAI needs to be included as part of the process of evaluating a property’s environmental conditions and assessing potential liability for any contamination. The intention of the ISA is to identify potential issues that may impact the Project with respect to the range of potential contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601).

The ISA investigation evaluated the Project limits for the presence of recognized environmental conditions (REC). The ASTM defines a REC as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.

The term “REC” is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Two additional types of RECs are included in the revised ASTM publication, including Historical REC (HREC) and Controlled REC (CREC). A HREC is defined by the ASTM as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by the regulatory authority without subjecting the property to any required controls.

A CREC is defined by the ASTM as a REC resulting from a past release of any hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by a no further action letter or equivalent or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

No significant data gaps were identified during the completion of this ISA. Certain exceptions in this ISA, to the AAI standard, included: 1) no property appraisals performed for the Project limits, and; 2) no direct interviews with the owners of the subject parcels. This report is not intended to serve as a compliance assessment of the subject property.
2 PROJECT LIMIT SETTING

SR 1 is a primary route connecting in the southern and central areas of Santa Cruz County and is the only continuous commuter route linking Watsonville, Capitola, Aptos, Cabrillo College, Santa Cruz, and the University of California, Santa Cruz. SR 1 is also a southern terminus for SR 9 and SR 17, which bring heavy tourist traffic to coastal destinations in Santa Cruz and Monterey counties. The Project limits extend approximately 2.6 miles along SR 1 with surrounding properties consisting of a mix of commercial, residential, and recreational sites.

2.1 Physical Setting

2.1.1 Topography
Santa Cruz County encompasses diverse topography, geologic features, and soils, including coastal terraces and alluvial valleys, steep foothills and mountains, known and potential earthquake faults and seismic hazards, and a wide range of soil types with varying constraints (e.g., expansion, liquefaction).

Based on California State Water Resources Control Board’s (SWRCB) GeoTracker website, the average elevation of the Project area is 120 feet above mean sea level. A copy of the Environmental Data Resources (EDR) Radius Map™ Report with GeoCheck® is provided in Appendix A.

2.1.2 Regional Geology
The Project is located within the Coast Ranges Geomorphic Province of California, which was formed by plate tectonic forces associated with the San Andreas Fault system. The northwest-southeast structural grain of the Coast Ranges is controlled by a complex of active faults within the San Andreas fault system. This province is characterized by low mountain ranges, generally parallel to the coast, with elevations of 1,500 to 3,000 feet, and primarily underlain by a large, elongated prism of granite and metamorphic basement rock types, bordered to the northeast by the San Andreas strike-slip fault system and to the southwest by the San Gregorio-Nacimiento strike-slip fault system. The Regional Geology Map is provided as Figure 8.

The Coast Ranges are the result of subduction of the Pacific plate beneath the western edge of the North American continental plate. Faulting, folding and erosion have produced the northwest-trending ridges and valleys, which characterize the Coast Ranges. Many of the rocks originated south of their current location and were transported north by the San Andreas Fault approximately 100 million years ago (California Geological Survey [CGS], 2002).

Most of the northern Coast Ranges consist of Mesozoic-age Franciscan Complex, which are comprised of graywacke (gray-green colored) sandstones, shales and conglomerates which have experienced low-grade metamorphism. The Franciscan Complex also contains chert, basalt, limestone, serpentinite, and high-pressure and low temperature metabasites (blue schists and eclogites) and meta-limestones. Fossils are found in chert beds of the Franciscan Complex. Serpentine is created when Franciscan sedimentary rocks are intruded by igneous rocks that have been metamorphosed. Serpentine and other ultramafic and mafic rocks are host to many plant species in California due to their high magnesium and iron concentrations. The southern Coast
Ranges were covered by the ocean during the early Miocene age, creating large sedimentary deposits. These deposits were uplifted approximately 10 million years ago. These sedimentary rocks are susceptible to weathering and have been tilted by tectonic forces. Because of the continental uplift and the weathering of these sediments, the changes in sea level over the years can be seen in the coastal terraces (CGS, 2002).

The Project is in a geologic area identified as Pleistocene-aged geologic unit. The Regional Geologic Map is provided as Figure 8.

2.1.3 Local Geology and Soils

Parikh Consultants, Inc., (Parikh) prepared the Project’s Preliminary Geotechnical Design Report, dated January 29, 2021 (2021). Based on Parikh’s report, the subsurface soil conditions near the State Park Drive overcrossing consist of slightly compact to very dense silty sand/well graded sand and gravel/clayey sand. At the Freedom Boulevard interchange, the subsurface soil consists of very dense to fine coarse sand; and at the Rob Roy Junction, the subsurface consists of slightly compact fine to coarse sand (Parikh, 2021).

Based on information from GeoTracker, subsurface conditions encountered near the Project limits consist of various types of sand, silty sand, clayey silt with sand, sandy gravel, and sandy clay, to approximately 30 feet below ground surface (bgs) (GeoTracker, 2021).

A soil map of the Project area was created on the National Resource Conservation Service (NRCS) website. The map indicated that the following soils series were dominant along the Project limits: Elkhorn Series, Watsonville Series, and Tierra Series.

- The Elkhorn series is characterized by deep, well-drained soils that formed from weathered alluvium, composed from mixed rock sources. This series has slow to rapid runoff with moderately low permeability. The Elkhorn Series has a small extent and is found primarily along the coastline of central California on coastal terraces with a slope that ranges from 2 to 50%.
- The Watsonville Series is characterized by deep, somewhat poorly drained soils that formed from alluvium. This series is poorly drained with slow to rapid runoff and very low permeability. The Watsonville series is not extensive, found primarily on coastal terraces and valleys along California’s central coast with a slope that ranges from 0 to 50%.
- The Tierra Series is characterized by deep, moderately well-drained soils that formed from alluvium derived from sedimentary rocks. This series has slow to rapid runoff and very low permeability. The Tierra Series has a moderate extent and is found primarily along the central and southern coast of California, typically on dissected terraces and low hills with a slope that ranges from 2 to 50% (NRCS, 2021).
Figure 8. Regional Geologic Map

Source: WRECO, 2022
2.1.4 Naturally Occurring Asbestos

Naturally occurring asbestos (NOA) can occur in serpentine rock and in its parent material, ultramafic rock. These rock types are found in the Franciscan Formation mélange (inclusion of fragments of rocks of all sizes in a fine-grained deformed matrix). NOA has been identified in Santa Cruz County (as fibrous amphiboles). The most common forms of NOA include chrysotile, actinolite, and tremolite. A review of the “General Location Guide for Ultramafic Rocks in California – Areas Likely to Contain Naturally Occurring Asbestos” (CGS, 2000) indicated that NOA has not been mapped in the vicinity of the Project corridor.

2.1.5 Groundwater Hydrology

The Project is in the Santa Cruz Mid-County Basin (3-001), as defined by the Department of Water Resources (DWR) Bulletin 118. The Santa Cruz Mid-County groundwater basin is located near the towns of Aptos, Capitola, and Soquel, extending inland from the Pacific Ocean in Santa Cruz County. The northeastern boundary generally follows the northwest trending Zayante Fault. The eastern boundary is marked by the Central Water District and Pajaro Valley Water Management Agency. The southern boundary follows the Pacific Ocean up to the Santa Cruz Small Craft Harbor. The western boundary follows the watershed boundary between Carbonera Creek and Branciforte Creek up through Blackburn Gulch (DWR, 2018).

The water-bearing sediments consist of the Pliocene Purisima Formation, which is overlain by Quaternary terrace deposits, and the Pleistocene Aromas Red Sands Formation. The Purisima and Quaternary terrace deposit have been locally incised by streams filled with Quaternary alluvium. The Purisima Formation is exposed along Monterey Bay where it is a cliff-forming unit. The Aromas Red Sands Formation extends into the Pajaro Valley Basin. It appears that the basin is supplied mostly from the Quaternary alluvium and terrace deposits. Groundwater cannot be the only viable water source for the surrounding areas due to sustainability and reliability issues of the local aquifers (DWR, 2004).

Based on Parikh’s Preliminary Geotechnical Design Report (2021), groundwater level is anticipated to vary with the passage of time due to seasonal groundwater fluctuation, surface and subsurface flows into nearby water coarse, ground surface run-off, and other environmental factors that may not be present at the time of previous field explorations.

Information obtained from the SWRCB’s GeoTracker website for sites within proximity to the Project limits indicated depth to groundwater ranges from 16 to 26.5 feet bgs and groundwater flow direction to the south-southwest (GeoTracker, 2021).

2.1.6 Surface Water Hydrology

The Project limits are within Aptos Creek, San Andreas, Soquel Creek watersheds.
The Aptos Creek watershed originates in the San Rosalia Mountains and flow predominantly from north to south. The watershed includes portions of the Forest of Nisene Marks State Park. One of the major tributaries that contributes to Aptos Creek is Mangels Gulch; its confluence with Aptos Creek is approximately 0.5 mi upstream of the SR 1 bridge crossing. Another major tributary to Aptos Creek is Valencia Creek. Valencia Creek originates along the northeastern boundary of the Aptos Creek watershed and like Aptos Creek, it flows predominantly in a north to south direction. Trout Creek Gulch is a major tributary to Valencia Creek, and their confluence is approximately 0.3 mi upstream of the confluence of Valencia Creek with Aptos Creek. Valencia Creek flows east west along the north side of SR 1 upstream of the confluence of Aptos Creek. The low flows of Valencia Creek are directed through a culvert that crosses under SR 1 and outfalls into Aptos Creek. An overflow channel just upstream of the SR 1 crossing allows the Valencia Creek flows that are not conveyed through the culvert to overflow into Aptos Creek upstream of the bridge crossing. Aptos Creek crosses SR 1 at a five-span bridge, and flows east west along SR Valencia Creek crosses SR 1 at an arch culvert.

Aptos Creek (upstream of its confluence with Valencia Creek) drains a watershed area of approximately 12.2 square mi, and StreamStats indicates that approximately 74 percent of the land is covered by forest (USGS, 2019). Valencia Creek (upstream of its confluence with Aptos Creek) drains a watershed area of approximately 12.1 square mi, and StreamStats indicates that approximately 53 percent of the land is covered by forest (USGS, 2019).

The 2017 effective Flood Insurance Study (FIS) for Santa Cruz County and Incorporated Areas, 06087CV001C (FEMA, 2017a), provides watershed areas for Aptos Creek at two locations: above the confluence with Valencia Creek and at the mouth of the Pacific Ocean. The watershed areas included in the FIS are comparable to the watershed areas delineated using StreamStats. According to the FIS, the watershed area of Aptos Creek above the confluence with Valencia Creek is 12.4 square mi, and the watershed area of Aptos Creek at the mouth of the Pacific Ocean is 24.5 square mi.

Aptos Creek and Valencia Creek are the principal tributaries in the watershed. Aptos Creek converges with Valencia Creek approximately 1 mile inland of Monterey Bay. Bridge Creek and Mangels Gulch empty into the Aptos Creek portion of the watershed and Trout Gulch empties into Valencia Creek (SCCDEH, 2021).

The northern Project limits of the SR 1 and the western limits of the Rail Trail Segment 12 are located within the Soquel Creek watershed and San Andreas. The stormwater drains located within Soquel Creek watersheds drain through underground pipes to the Pacific Ocean. Soquel Creek watershed is considered to be one of the major watersheds in Santa Cruz County (SCCDEH, 2021).

A small portion of the southwestern Project limits within the Rail Trail Segment 12 is located within the San Andreas watershed. San Andreas watershed is bordered on the north and east by the Pajaro River watershed and to the west by the Aptos Creek watershed. San...
Andreas drains an area of approximately 15 square mi and is comprised of Bush Gulch and two unnamed streams. Land use is predominantly agriculture with some rural and urban residential areas (SCCDEH, 2021).

Figure 9 shows the various watersheds located within Santa Cruz County and Figure 10 shows the three watersheds within the Project limits. The Aptos Creek and Valencia Creek watersheds are shown on Figure 11.

2.1.7 Current Land Use

The Project limits are within Santa Cruz County and the Project extends through the unincorporated communities of Aptos, Rio Del Mar, Seacliff and Aptos Hills- Larking Valley (Santa Cruz County GIS web tool, 2019). The bordering properties are recreational, residential, and commercial. The proposed Project limit and the Santa Cruz County Assessor Parcel Number (APN) for adjoining properties are shown (from west to east) in Figures 12 through 17.

The western end of the corridor along SR 1 begins at the intersection of State Park Drive at PM SCR 10.60 and SR 1, and continues east for approximately 2.6 miles to Freedom Boulevard at PM R8.1. The immediate surroundings of SR 1 consist of vegetation along the shoulders of the roadway. Frontage roads are primarily parallel to the Project limits on both the north and south sides of SR 1, which are surrounded with residential and commercial properties. These properties are characterized by, but not limited to, gas stations, tire shops, auto repair shops, and shopping centers.

The surrounding properties adjoining the Project area (SR-1 corridor and Segment 12) include:

- **Western segment** – The western segment is surrounded by residential and commercial properties. The most notable properties in the western segment include:
  - Nursery (APN: 039-201-37); Hotel (APN: 039-201-32 and 039-421-06); Shopping Center with a gas station (APN: 039-221-12, 039-221-11; and 039-231-09); Church (APN: 042-011-06); Aptos Tire Auto Care (APN: 041-561-06); Vehicle Repair (APN: 041-561-05)

- **Middle segment** – The middle segment is surrounded by commercial properties with minimal residential properties. The most notable properties in the middle segment include:
  - Arco Gas Station (APN: 044-295-01); Restaurant (APN: 044-29-09); Shopping Center (APN: 044-295-12)

- **Eastern segment** – The eastern segment is surrounded by residential and commercial properties. The most notable properties in the eastern segment include:
  - Veterinary Clinic (APN: 041-662-05); Vacant lot (APN: 044-063-02); Church (APN: 041-661-05)

3 INITIAL SITE ASSESSMENT

WRECO reviewed the SWRCB GeoTracker database, the Department of Toxic Substances Control’s (DTSC) EnviroStor database, and the EDR regulatory and historical databases and maps for information relevant to the potential presence of pollution within the Project limits. WRECO also performed a field reconnaissance to evaluate the existing conditions in the Project area and near the Project limits.

3.1 Records Review

3.1.1 SWRCB GeoTracker Database
GeoTracker is the SWRCB’s data management system for sites that impact groundwater or have the potential to impact groundwater. The GeoTracker online database contains sites that require groundwater cleanup as well as permitted facilities that could impact groundwater.

A review of the online GeoTracker database listed 15 records for individual locations within 1 mile of the Project limit that coincide with some of the sites identified in the EDR database. According to the SWRCB, there were no sites with known cleanup or hazardous waste sites within or adjacent to the Project limits. All of the sites within the Project limits have received closure or no further action status. The GeoTracker sites within a 1-mile radius of the Project limits are shown in Figure 19 and Figure 20.

3.1.2 DTSC EnviroStor Database
The DTSC’s EnviroStor database is an online search and geographic information system (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. It also identifies facilities that are authorized to treat, store, dispose, or transfer hazardous waste.

The DTSC EnviroStor database did not list any sites within a 1-mile radius of the Project limits, as shown in Figure 21.

3.2 EDR Database Record Review

3.2.1 Radius Report with GeoCheck

In accordance with ASTM Standard E1527-13 (E1527-21 Pending EPA approval) and as part of the ISA, a computerized radius search of pertinent federal, state, and tribal environmental record databases was performed by EDR of Shelton, Connecticut. The database search was conducted to identify environmental regulatory records associated with the Project area and nearby properties that would indicate environmental conditions (i.e., reported releases of hazardous substances and/or petroleum products) that may have the potential to adversely impact the Project area and surrounding vicinity. Database listings in the EDR were reviewed for properties located within a 1-mile radius of the Project limits and compared with other regulatory records reviewed during this ISA. The Project area (or “Target Property” referenced in Table 2) was listed in several of the federal, state, and local databases searched by EDR. Properties located near the Project limits that were identified in one or more of the EDR databases searched are discussed below in Table 2.

NOTE: TP = Target Property; NR = Not Requested at this Search Distance

July 2022
Multiple federal and state agency database listings were identified within the ASTM-specified search distances from the Project limits. A total of 237 sites were plotted in the EDR Database, with 63 site within the target property; 141 sites located within 0.125 mile from the Project limit; 27 sites located between 0.125 – 0.25 mile; and six sites between 0.25 – 0.5 mile. A release resulting from activities at nearby properties can sometimes impact surrounding properties. Regulatory records concerning nearby properties are reviewed to identify a release of hazardous materials, which would be expected to impact conditions within the Project limits.

To evaluate whether a database address listing represents a REC with respect to the Project area, the following criteria were applied for this ISA:

- The listing must indicate that a hazardous substance release (or spill or discharge) has occurred or is likely to have occurred. In the absence of a release to the environment, it is unlikely that an address listing represents a REC with respect to the Project area.
- The Project must be located downgradient to the listed address. Local groundwater flow direction is likely to the south-southwest, based on local topography and nearby groundwater information. An address with a known or suspected release must be upgradient and therefore generally to the north-northeast of the Project to represent a REC with respect to the Project area. A listed address that is cross- or downgradient with respect to the Project is unlikely to represent a REC for the Project area.
- A known or suspected release at an off-site location must have affected or must have the potential to affect groundwater flowing toward the Project.

3.2.2 Project Limits

Some properties that are directly adjoining the Project limits were listed in some of the federal and state agency databases, Resource Conservation and Recovery Act (RCRA) non-generating hazardous waste (RCRA NonGen/NLR), EDR Exclusive Historical Auto Stations (EDR Hist Auto), underground storage tank (UST), CA FID (California Facility Inventory Database), Leaking Underground Storage Tank (LUST), “Cortese” Hazardous Waste & Substances Sites List (Cortese), California Environmental Protection Agency Regulated Site Portal Data (CERS), California Environmental Reporting System (CERS) Hazardous Waste (CERS HAZ WASTE), CERS Tanks (CERS TANKS), Certified Unified Program Agency Listing (CUPA), Facility Manifest Data (HAZNET), Facility Index System/Facility Registry System (FINDS), and Enforcement & Compliance History Information (ECHO), Historical Hazardous Waste & Substances Sites List (CA HIST CORTESE), Hazardous Substance Storage Container Database (HIST UST), RCRA Small Quantity Generator (RCRA-SGQ).

The adjoining properties to the Project limit were identified in the GeoTracker database and EDR database, as summarized in Table 3.

3.3 Historical Use Information

Information regarding prior uses of the Project area was collected using available historical reference sources. Information related to the historical use of this property and surrounding area was obtained from a review of aerial photographs, historical topographic maps, fire insurance maps, and city directory information provided as part of the EDR report.

3.3.1 Historical Topographic Maps

A historical topographic map report was prepared by EDR and included a search of a collection of public and private topographic maps. Maps dated 1912 (Capitola 15-minute), 1914 (Capitola 15-minute), 1954 (Soquel 7.5-minute and Watsonville West 7.5-minute), 1968 (Soquel 7.5-minute and Watsonville West 7.5-minute), 1980 (Soquel 7.5-minute and Watsonville West 7.5-minute), 1987 (Capitola 15-minute), 1994 (Soquel 7.5-minute and Watsonville West 7.5-minute), 1995 (Watsonville West 7.5-minute), and 2012 (Soquel 7.5-minute and Watsonville West 7.5-minute) were provided for review by EDR. The EDR Historical Topo Map Report with QuadMatch™ is included as Appendix B. The Project area historical use based on the topo map review is described in Table 4.

3.3.2 Historical Aerial Photography

Historical site uses can frequently be ascertained from a review of aerial photographs. Aerial photographs of the Project limits and surrounding area were provided by EDR for the following years: 1948 (US Forest Service), 1956 (USDA), 1968 (USGS), 1974 (USGS), 1981 (USDA), 1993 (USGS/DOQQ), 2005 (USDA/NAIP), 2009 (USDA/NAIP), 2014 (USDA/NAIP), and 2020 (USDA/NAIP). The EDR Aerial Photo Decade Package is included in Appendix C. The Project area’s historical use based on the aerial photograph review is described in Table 5.

3.3.3 Sanborn Fire Insurance Maps

Fire insurance maps (Sanborn Maps) are used to determine fire hazards and were produced for most urban areas beginning in the late 1800s. EDR searched for Fire Insurance Maps for the Project area and five were found. The Sanborn Fire Map summary is summarized in Table 6 and the Certified Sanborn® Map Report is included as Appendix D.

3.3.4 City Directory Review

Historical use near the Project area can be inferred from previous companies that may have operated at and in nearby facilities for the Project footprint. The Project area had listings in the research source (EDR Digital Archive and Pol’s City Directory) for the years 1968 to 2017. The EDR City Directory Image Report is provided in Appendix E. A summary of the historical city directory records researched in proximity of the Project area is included in Table 7 and Table 8.

3.3.5 Local Agency Records Search

WRECO queried the SCCEHS for records regarding any sites that might be located within the vicinity of the Project area that have potential to impact the proposed Project. The sites reported from the SCCEHS were consistent with the sites reviewed on GeoTracker and the EDR Area/Corridor Report, and did not have potential to impact the Project area.

3.4 Reconnaissance of the Project Limit and Vicinity

On February 3 and 8, 2021, and December 17, 2021, a site reconnaissance was performed by WRECO to evaluate the existing conditions within the proposed Segment 12 and SR 1 Project limits, respectively. The Project area was assessed for current land-use activities and environmental conditions to identify any existing or potential RECs within the Project limits and adjoining properties. The site reconnaissance was documented with photographs, and a photo log is provided in Appendix F. The weather was dry and sunny and did not limit the site walk or observations of RECs.

As part of the reconnaissance, WRECO looked for evidence of the presence, use, or storage of hazardous substances, including but not limited to the following:

- areas of disturbed or discolored soil;
- suspect equipment and/or building material which may contain hazardous substances;
- areas of distressed vegetation;
- wastewater discharge areas;
- evidence of tanks/septic systems;
- waste management/disposal areas;
- lagoons, pits, or sumps;
- surface water management areas; and
- stained surfaces.

The site reconnaissance for Segment 12 was conducted on February 3, 2021. The railroad corridor for the Project begins at State Park Drive in between Sea Ridge Road and Hillcrest Drive and ends between Townsend Drive and Sumner Avenue. The railroad track is currently inactive but is fully intact with metal rails and wooden ties. The railroad corridor is adjacent to an active Chevron
Service Station, and is surrounded by redwood trees, minimal utility poles with mounted transformers, and minimal sections of sound barrier walls.

The site reconnaissance for the SR 1 corridor was conducted on February 8, 2021, and December 17, 2021. SR 1 is surrounded by primarily residential and commercial properties. Roads along and adjacent to SR 1 contain white striping paint along the shoulder lanes and yellow striping paint for the center double lines. Service roads adjacent to SR 1 are lined with utility poles, some with mounted transformers, and a few scattered above-ground transformers. During the site reconnaissance, the Valencia Lagoon was dry with painted concrete walls. The Caltrans ISA checklist is provided in Appendix G.

The ISA identified the following potential RECs within the Project limits including:

- Historical agricultural practices (pesticides and metals) could have potential impact on subsurface soil within the Project limits;
- Potential for aerially deposited lead (ADL) in exposed soil along the roadways from historical vehicle emissions during the leaded gasoline era;
- Potential petroleum hydrocarbons in soil and groundwater from leaking underground storage tank (LUST) sites in proximity to (and upgradient) of the Project limits;
- Potential volatile organic compounds (VOC) from drycleaner sites in proximity to (and upgradient) of the Project limits;
- Utility poles along the frontage roads and bridges crossing SR 1 have pole-mounted transformers, which may contain polychlorinated biphenyls (PCB), and treated wood poles may contain metals and polyaromatic hydrocarbons (PAH);
- The former railroad corridor has the potential of heavy metals, semi-volatile organic compounds (SVOC), PAHs, and PCBs in soil;
- Potential lead-based paint (LBP) in the traffic striping on the highway, the Rio Del Mar Boulevard overcrossing bridge, and Railroad Bridges over SR 1; and
- Potential asbestos-containing materials (ACM) within the concrete portions of the Rio Del Mar Boulevard overcrossing and Railroad bridges over SR 1.

### 3.5 ISA Findings and Recommendations

According to historical research and records, the surrounding properties adjacent to the Project area were utilized for agricultural land use until the mid- to late 1950s when the development of residential and commercial properties began.

Based on the findings of the ISA, a Preliminary Site Investigation (PSI) is recommended for the Project area. The ISA identified several potential RECs which are summarized in Table 9 below.
### Table 9. Summary of RECs and Recommendations

<table>
<thead>
<tr>
<th>Description</th>
<th>Evidence of REC Found</th>
<th>Recommended Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agricultural Use</td>
<td>Based on the agricultural use of the land, pesticides, herbicides, and heavy metals may be present along the roadway.</td>
<td>Preliminary Site Investigation (PSI): &lt;br&gt;- Analyze soil samples for organophosphorus/organochlorine pesticides and metals</td>
</tr>
<tr>
<td>ADL</td>
<td>There is a potential for elevated levels of lead in exposed soil from historical vehicle emissions since leaded gasoline was used through the 1970s. The shoulders of the roadway may contain ADL.</td>
<td>PSI: &lt;br&gt;- Analyze soil samples for total lead/pH</td>
</tr>
<tr>
<td>Utility Poles/Treated Wood</td>
<td>Treated wood contains chemical preservatives, that include metals (arsenic, chromium, copper) and PAHs (creosote, and pentachlorophenol), which are known to be toxic and carcinogenic. Transformers mounted to utility poles may contain PCBs.</td>
<td>PSI: &lt;br&gt;- Analyze soil samples for PAHs, PCBs, and metals near utility poles</td>
</tr>
<tr>
<td>Bridge Structures</td>
<td>The concrete portions of the bridge structures over SR 1, may contain ACM. The traffic striping on the highway, the Rio Del Mar Boulevard overcrossing bridge, and Railroad Bridges over SR 1, may contain LBP.</td>
<td>PSI: &lt;br&gt;- Sample the concrete structures for ACM &lt;br&gt;- Sample traffic striping (as needed) and painted surfaces on the Railroad Bridges for LBP</td>
</tr>
<tr>
<td>LUST and Drycleaner Sites</td>
<td>Potential petroleum hydrocarbons from LUST cleanup sites, and VOCs from drycleaner cleanup sites along the Project limits.</td>
<td>PSI: &lt;br&gt;- Analyze soil samples for gasoline/diesel fuel and VOCs</td>
</tr>
<tr>
<td>Railroad Corridor</td>
<td>The railroad poses potential for elevated levels of heavy metals, SVOCs, PAHs, and PCBs in the former railroad corridor.</td>
<td>PSI: &lt;br&gt;- Analyze soil samples for metals, SVOCs, PAHs, and PCBs along the railroad corridor</td>
</tr>
</tbody>
</table>

4 LIMITATIONS

The scope of an ISA is limited to anecdotal and visual evidence of potential RECs and does not include verification of RECs based upon environmental testing. The ISA for the SR 1 Auxiliary Lanes and Bus-on-Shoulder Improvements (Freedom Boulevard to State Park Drive) and Coastal Rail Segment Project located in Santa Cruz County, California, was performed in general accordance with the Caltrans standard and AAI procedures and guidelines. All readily available materials pertaining to the Project area were reviewed to prepare this document. Opinions given in this ISA report, relative to the potential for hazardous materials to exist within the Project limits, are based on the information derived from the site reconnaissance conducted on February 3 and 8, 2021, December 17, 2021, and from other research information and sources described herein.

As is the case for any project that proposes excavation, the potential exists for unknown hazardous contamination to be revealed during project construction. The ISA is not a site investigation to prove that the Project area is environmentally devoid of hazardous or toxic materials. Information and data were provided by presumably competent third parties with knowledge about the site and surrounding areas.

This ISA consists of professional opinions and recommendations made in accordance with generally accepted environmental principles and practices. The conclusions are based upon an evaluation of the information gathered and general observations of conditions prevalent in the Project area during the site visit. This ISA does not otherwise provide any implied or expressed guarantees regarding the characteristics or conditions of environmental media within the Project limits. Readily available public information sources were reviewed and presumed to provide complete and accurate information, without independent verification. The findings and conclusions in this report are based solely on the limited scope of an ISA, and it is not warranted that the Project does not contain hazardous materials or petroleum hydrocarbon releases in areas not identified in this report.

This ISA is not intended to identify ALL hazards or unsafe conditions or to imply that others do not exist. This assessment was planned and implemented based on a mutually agreed scope of work and WRECO’s experience in performing this type of assessment. WRECO has performed this assessment in a professional manner using the degree of skill and care exercised for similar Projects under similar conditions, by reputable and competent environmental consultants. WRECO shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time that this survey was conducted.

WRECO states that no warranties, expressed or implied, are made regarding the quality, fitness, or results to be achieved because of this report or impacted by information not properly disclosed to WRECO at the time of this report. No responsibility is assumed for the control or correction of conditions or practices existing in the Project area.

- CERS ID: 10657939
- CERS Description: Chemical Storage Facilities

Violations:
- Site ID: 364148
- Site Name: Apts Tire & Auto Care
- Violation Date: 02-08-2016
- Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
- Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
- Violation Notes: Returned to compliance on 11/14/2017. OBSERVATION: The facility has
not annually reviewed and certified that the business plan is
complete, accurate, and up-to-date. The facility has not begun
reporting the business in the California Environmental Reporting
System (CERS). This observation was noted during the last routine
inspection at this facility on November 7, 2013. Therefore, the
violation was increased to a Class II violation. CORRECTIVE ACTION:
Review, revise, certify, and submit the business plan electronically
in CERS.

Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 07-06-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter
6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when
storing/handling a hazardous material at or above reportable
quantities.
Violation Notes: Returned to compliance on 11/14/2017. OBSERVATION: The business failed
to complete and electronically submit to the California Environmental
Reporting System (CERS) a Hazardous Materials Business Plan (HMBP)
when handling hazardous materials at or above the reportable threshold
quantities. CORRECTIVE ACTION: Complete and electronically submit to
the CERS a HMBP.

Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 07-06-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter
6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency
response plan and procedures for a release or threatened release of a
hazardous material.
Violation Notes: Returned to compliance on 11/14/2017. OBSERVATION: The business failed
to establish and electronically submit in the California Environmental
Reporting System (CERS) a Hazardous Materials Business Plan (HMBP) an adequate Consolidated Emergency Response / Contingency Plan (CERC) for a release or threatened release of a
hazardous material. CORRECTIVE ACTION: Establish and electronically submit to the CERS an CERC for a release or threatened release of a
hazardous material within 30 days.

Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 02-08-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter
6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate training
program in safety procedures in the event of a release or threatened
release of a hazardous material.
Violation Notes: Returned to compliance on 07/06/2017. OBSERVATION: The training program in the business plan is not reasonable and appropriate for the size of the business and the nature of the hazardous materials handled. CORRECTIVE ACTION: Revise the training program in the business plan to ensure it is reasonable and appropriate for the size of the business and the nature of the hazardous materials handled and submit electronically in the California Environmental Reporting System (CERS).

Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Citation: HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. Returned to compliance on 11/14/2017. OBSERVATION: The business plan and the inventory of hazardous materials has not been updated and submitted to the California Environmental Reporting System (CERS) to this department within 30 days of starting business operations]. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in CERS.

Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 11-07-2013
Citation: 22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description: Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste
management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.

Violation Notes: Returned to compliance on 07/06/2017.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 11-07-2013
Citation: 19 CCR 4 2729.5 - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.5
Violation Description: Failure to submit inventory reports (Activities, Owner/Operator, Hazardous Materials Descriptions and Map pages, if required. Documentation must be resubmitted (for facilities which exceed EPCRA thresholds) or re-certified (for facilities which do not exceed EPCRA thresholds) by March 1.
Violation Notes: Returned to compliance on 06/14/2014.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 02-08-2016
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly.
Violation Notes: Returned to compliance on 07/06/2017. OBSERVATION: Three 55 gallon drums (one plastic and two metal; waste antifreeze and waste oil, respectively) outside in back of the building. No documentation of inspection of the containers is being conducted. The owner or operator shall inspect areas used for container storage or transfer, at least weekly, looking for leaking containers and for deterioration of containers and the containment system caused by corrosion and other
factors. This observation was noted during the last routine inspection at this facility on November 7, 2013. Therefore, the violation was increased to a Class II violation. CORRECTIVE ACTION: Immediately begin conducting the necessary weekly inspections for all hazardous waste containers at this facility.

Violation Division: Santa Cruz County Environmental Health

Violation Date: 07-06-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 11/14/2017. OBSERVATION: The generator has not obtained an active EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an EPA ID number.

Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 11-07-2013
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly.
Violation Notes: Returned to compliance on 07/06/2017.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 364148
Site Name: Aptos Tire & Auto Care
Violation Date: 02-08-2016
Citation: 22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description: Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous
waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.

Violation Notes: Returned to compliance on 07/06/2017. OBSERVATION: Three 55 gallon drums (one plastic and two metal containing waste antifreeze and waste oil, respectively) outside in back of the building. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. This observation was noted during the last routine inspection at this facility on November 7, 2013. Therefore, the violation was increased to a Class II violation. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 06/22/2017. OBSERVATION: The business failed to establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material. The currently electronically submitted Emergency Response/Contingency Plan in the California Environmental Reporting System (CERS) does not include an Earthquake Vulnerability section. CORRECTIVE ACTION: Establish and electronically submit in the CERS an adequate emergency response procedures for a release or threatened release of a hazardous material within 30 days (CERS Consolidated Emergency Response/Contingency Plan). A template can be found at the following web link: https://www.calepa.ca.gov/files/2017/05/CUPA-Documents-eTemplates-Contingency.pdf.

Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 12/15/2015. OBSERVATION: The business failed to electronically submit and certify in the California Environmental Reporting System (CERS) that the business plan is complete, accurate, and in compliance with the Emergency Planning and Community Right-to-Know Act (EPCRA) on or before the annual due date. The last CERS submittal was electronically submitted on December 15, 2015. CORRECTIVE ACTION: Electronically submit and certify in CERS that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date.

**Eval General Type:** Compliance Evaluation Inspection
**Eval Date:** 06-13-2017
**Violations Found:** Yes
**Eval Type:** Routine done by local agency
**Eval Notes:** Onsite for the annual Certified Unified Program Agency (CUPA) inspection for the storage, use, and disposal of hazardous materials and/or hazardous wastes. Our agency recommends keeping a log for the annual and initial (within first 6 month of hire) employee hazardous materials training and the weekly inspections of your hazardous materials training and the weekly inspections of your hazardous materials (waste/used oil and waste antifreeze). Our agency recommends replacing the National Fire Protection Association (NFPA) diamond warning sign on the waste oil tank enclosure since the current sign has become weathered and difficult to read. According to Safety-Kleen, the NFPA rating sign for used oil is as follows: Health (Blue) = 1; Fire (Red) = 1; and Reactivity (Yellow) = 0. Since facility employees were not aware, our agency also recommends reminding all facility employees that used oil filters and fuel filters without metal housings (also known as filter media cartridges or inserts) are not considered recyclable and cannot [Truncated]

**Environmental Interest/Information System:**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CERS:
Name: BRANCIFORTE AUTO REPAIR INC
Address: 10105 SOQUEL DR
City, State, Zip: APTOS, CA 95003
Site ID: 99854
CERS ID: 10192642
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 99854
Site Name: BRANCIFORTE AUTO REPAIR INC
Violation Date: 03-08-2016
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly.
Violation Notes: Returned to compliance on 03/08/2016. OBSERVATION: There is one 55 gallon antifreeze drum, one 55 gallon waste antifreeze drum, and three 55 gallon drums of waste oil. According to the owner/operator, the waste hauler inspects and documents that the containers during pick-ups, approximately every three weeks. The above containers are not being inspected on a weekly basis. The owner or operator shall inspect areas used for container storage or transfer, at least weekly, looking for leaking containers and for deterioration of containers and the containment system caused by corrosion and other factors [Title 22 CCR 66265.174], CORRECTIVE ACTION: Immediately begin conducting the necessary weekly inspections for all hazardous waste containers at this facility. I provided a template for a weekly inspection log. I observed the violation correction during the inspection.

Violation Program: HMRRP
Violation Source: CERS

Site ID: 99854
Site Name: BRANCIFORTE AUTO REPAIR INC
Violation Date: 02-19-2014
Citation: HSC 6.95 25504(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(c)
Violation Description: Failure to include provisions in the business plan to ensure that appropriate personnel receive initial and annual training.
Violation Notes: Returned to compliance on 03/08/2016.

Violation Program: HMRRP
Violation Source: CERS

Site ID: 99854
Site Name: BRANCIFORTE AUTO REPAIR INC
Violation Date: 05-10-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
EDS GARAGE (Continued)

Violation Notes: Returned to compliance on 10/19/2018. Training records for year 2017 could not be found at time of inspection. Hold a training within 30 days concerning the management of hazardous materials/waste and emergency response. Send a copy of the sign in sheet to Environmental Health along with the "Return to Compliance Form" provided on the back page of this inspection form. Owner provided sign in sheet for the training that was held.

Eval Date: 08-12-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to observe the management of hazardous materials/waste, training and record keeping. All chemicals are stored properly in secondary containment. All containers of hazardous waste have the proper labels on them that are filled out properly. Owner keeps all hazardous waste manifests in order. Training is given to all employees yearly. No violations were observed here today.
Eval Division: Santa Cruz County Environmental Health
Eval Program: HW
Eval Source: CERS
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-08-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite for annual routine inspection. Noted the waste oil secondary containment has an oil/water liquid mixture at the bottom of the containment. Enough liquid was in the secondary containment to produce a reflection. Under SC County Code 7.100.170, I instructed the facility operator to have the oil/water liquid mixture pumped out and to keep the secondary containment free of liquid and debris.

Site Name: SEACLIFF 76 INC
Violation Date: 11-24-2015
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95,
Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the
business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 11/25/2015.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 401858
Site Name: SEACLIFF 76 INC
Violation Date: 12-19-2018
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7,
Section(s) 25292.1(a)
Violation Description: Failure to operate the UST system to prevent unauthorized releases
including leaks, spills, and/or overfills.
Violation Notes: Returned to compliance on 12/11/2019. Overfill Flapper Valve does not
shut off flow at 95% as required. Correct and retest.
Violation Division: Santa Cruz County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 401858
Site Name: SEACLIFF 76 INC
Violation Date: 12-14-2020
Citation: 23 CCR 16 2715(c)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(4)
Violation Description: Failure to maintain a list of employees trained by the designated operator on-site or off-site at a readily available location, if approved by the UPA. For training that occurs on or after October 1, 2018, failure to maintain a copy of the “Facility Employee Training Certificate” on-site or off-site at a readily available location, if approved by the UPA.
Violation Notes: Maintain the employee training certificate on site available for review on request.
Violation Division: Santa Cruz County Environmental Health

Violation Date: 12-14-2020
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: “Hazardous Waste”, name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: The container holding used coolant was not labeled with all required information. Containers holding hazardous waste shall be labeled at all times as required by CCR-T22.
Violation Division: Santa Cruz County Environmental Health

Violation Date: 12-14-2020
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: One float and chain and both floats and chains at UDC’s 5/6 and 7/8 respectively failed to shut off their impact valves. Repair or replace the float and chain assemblies as necessary and retest to ensure operation as required by CCR-T23.
Violation Division: Santa Cruz County Environmental Health

Violation Date: 12-14-2020
Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293
Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes: The monitoring alarm history recorded a fuel alarm in a turbine sump.
on January 16, 2020 but no documentation of actions taken as a result of the alarm were provided for review. Documentation of actions taken to investigate the reasons for an alarm should occur and should be available for review on request.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS detail in the EDR Site Report.

Name: SAFEWAY 0640
Address: 16 RANCHO DEL MAR
City, State, Zip: APTOS, CA 95003
Site ID: 149939
CERS ID: 10156429
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 149939
Site Name: Safeway 0640
Violation Date: 01-31-2019
Citation: 22 CCR 15 66265.177 - California Code of Regulations, Title 22,
Chapter 15, Section(s) 66265.177
Violation Description: Failure to separate incompatible wastes from the same container,
nearby containers, or unwashed containers which previously contained
incompatible waste or materials.
Violation Notes: Returned to compliance on 01/31/2019. Observed a bottle of cough syrup
in the "toxics" container. Double check every item before you put it
into a hazardous waste container to be sure it is going into the
proper container. Cough syrup was put into the proper container at
the time of inspection.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 149939
Site Name: Safeway 0640
Violation Date: 06-08-2016
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter
1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly and
look for leaking and deteriorating containers.
Violation Notes: Returned to compliance on 06/24/2016. OBSERVATION: The Hazardous Waste
Rack containers outside the ICC Office were not being inspected weekly
every month (some months the containers were inspected four times a
month, some times two times a month, and sometimes once a month). No
inspection logs were observed for the 2015 calendar year and January
2016. The owner or operator shall inspect areas used for container
storage or transfer, at least weekly, looking for leaking containers
and for deterioration of containers and the containment system caused
by corrosion and other factors. The CUPA noted during the April 23,
2013, inspection that hazardous waste inspections were not being

TC6803714.1s Page 188
SAFEWAY 0640 (Continued)

conducted and documented weekly. CORRECTIVE ACTION: Immediately begin conducting the necessary weekly inspections for all hazardous waste containers at this facility.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-27-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to observe the storage of hazardous waste and record keeping. Items in the take back program were all stored properly. Training is done each year, on computer. Hazardous waste manifests are kept up well. Weekly and monthly inspections are logged. All cylinders are properly stored. No violations were observed today.
Eval Division: Santa Cruz County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-31-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to observe the management of hazardous materials/waste, training and record keeping. All hazardous waste manifests are kept up to date. All employees are trained yearly. Observed a bottle of cough syrup in the “toxics” container. Make sure that the employees understand the different hazard classes and why they shouldn’t mix together. Double check every item before you put it into a hazardous waste container to be sure it is going into the proper container. Cough syrup was put into the proper container at time of inspection. All gas cylinders were chained up properly.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-14-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to witness the annual monitor certification test, training and record keeping. Three sensors were active when we got to the station. 2 brine sensors and 1 vacuum. Brine in dispenser 1/2 and brine in the piping sump for diesel. Technician filled the brine in both cases during inspection. All sensors passed during inspection including: annulars, fill sumps, piping sumps and turbine shut down. Dispenser sumps including turbine shut down. All brine sensors, vacuum sensors, fail safe and sensor out, line leak detectors. Spill buckets passed. Training is given to employees yearly. Hazardous waste manifests are kept up to date. Hazardous waste container has proper hazardous waste label and is fill out properly. After inspection was over two sensors were still active. I called the corporate contact to let him know of this chronic issue. No other violations were observed here today.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS AIR POLLUTANT MAJOR

CERS ID: 10831720
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-05-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: Santa Cruz County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-05-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to observe the management of hazardous materials/waste, training and record keeping. All chemicals are stored properly. All containers of hazardous waste have the proper labels. Hazardous waste areas are kept very clean and organized. Facility is new and therefore does not have any records of hazardous waste pickups yet or training either. Hold a refresher training for all employees yearly concerning the management of hazardous materials/waste and what to do in case of an emergency response. No violations were observed at this site.

Site Name: CALIFORNIA HIGHWAY PATROL
Violation Date: 09-29-2016
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes: Returned to compliance on 10/13/2016. OBSERVATION: The two 55 gallon drums of waste oil and the 55 gallon drum of drained oil filters are
not being inspected. The owner or operator shall inspect areas used
for container storage or transfer, at least weekly, looking for
leaking containers and for deterioration of containers and the
containment system caused by corrosion and other factors. A weekly
inspection template was provided during the inspection. CORRECTIVE
ACTION: Immediately begin conducting the necessary weekly inspections
for all hazardous waste containers at this facility.

Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 388869
Site Name: CALIFORNIA HIGHWAY PATROL
Violation Date: 09-29-2016
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter
6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any
one of the following events: A 100 percent or more increase in the
quantity of a previously disclosed material. Any handling of a
previously undisclosed hazardous materials at or above reportable
quantities. A change of business address, business ownership, or
business name. A substantial change in the handler’s operations that
requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 10/12/2016. OBSERVATION: The business plan
has not been updated and submitted to this department within 30 days
of the addition of the two propane tanks for the mobile heaters, road
flares in the Storage Area #3, and the ammunition in the Storage Shed
and the removal of the 55 gallon drum of used antifreeze and the
removal of the 50 gallons of stoddard solvent. It was noted in
February 27, 2015, inspection that the road flares should be added to
the inventory and the used antifreeze and stoddard solvent should be
removed from the inventory. CORRECTIVE ACTION: Review, revise, and
certify the business plan electronically in the California
Environmental Reporting System (CERS).

Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 09/29/2016. OBSERVATION: The left 55 gallon waste oil drum had a funnel in the open bung and no oil was actively being placed in the drum. All hazardous waste containers shall be closed at all times except when adding or removing waste. At the time of the inspection, the funnel was removed and the bung lid properly closed. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste. This violation was closed during the inspection.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: TAS
RB Case Number: 3348
Local Agency: SANTA CRUZ COUNTY
File Location: Regional Board
Local Case Number: RO0000026
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Gasoline
Site History: Annual Monitoring and sampling program. One well not sampled. Residual soil and groundwater contamination may still exist on-site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or de-watering. The Central Coast Water Board, Santa Cruz County Environmental Health Services (SCCEHS), and the appropriate local planning and building departments must be notified prior to any changes in land use, grading activities, excavation, or dewatering. This notification must include a statement that residual soil and groundwater contamination underlie the property and nearby properties. The levels of residual contamination and any associated risks are expected to reduce with time.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 435641
Site Name: AT&T California - NF280
Violation Date: 02-16-2017
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description: Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes: Returned to compliance on 03/08/2017. OBSERVATION: The designated operator (DO) reports indicate the installed automatic tank gauge (ATG) failed/alarmed more than once during the last year. The DO reports describe that the electronic connections were cleaned and the ATG was then operable. The ATG was tested and passed during the inspection today. However, when the technician reinstalled the ATG after testing it could not communicate with the alarm system. The technician clean the connections, but was this fix did not correct the communication problem with the alarm system. The technician indicated the ATG needed replacement. The ATG was not working when our agency left the facility. The underground storage tank system shall be operated to prevent unauthorized releases. CORRECTIVE ACTION: Immediately install a proper functioning of ATG in tank leak detection monitoring system. Submit verification to the CUPA.

Violation Source: CERS

Site ID: 435641
Site Name: AT&T California - NF280
Violation Date: 02-16-2017
AT&T CALIFORNIA - NF280 (Continued)

Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637
Violation Description: Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester.
Violation Notes: Returned to compliance on 04/27/2020. OBSERVATION: A passing secondary containment testing was last performed on December 3, 2016. Secondary containment testing was conducted on November 7, 2016, but the fill/piping sump did not pass the test because of a tear in the secondary containment piping boot. Testing has not been completed and it has been more than three months since the last failed test. Secondary containment testing is required once every 36 months. CORRECTIVE ACTION: Immediately schedule this test and provide 48 hours notification to the CUPA.
Violation Division: Santa Cruz County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 435641
Site Name: AT&T California - NF280
Violation Date: 02-17-2016
Citation: 23 CCR 16 2636(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)
Violation Description: Failure to continuously monitor the interstitial space of the tank, piping and/or sumps sump such that the leak detection activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 02/17/2017. OBSERVATION: The L1420 annular sensor failed to activate an audible and visual alarm when tested and, therefore, the tank is not monitored. The interstitial space shall be monitored with a monitoring system connected to an audible and visual alarm system. The sensor was replaced and retested during the inspection. CORRECTIVE ACTION: Immediately contact a properly licensed, trained, and certified contractor to replace the failed component with a functional component (LG 113-x listed, if applicable) under permit and inspection of the CUPA within one business day.

Eval Date: 02-16-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: A routine facility inspection was conducted on this date. Monitoring certification testing was conducted by Tait Environmental Services, Inc. (Tait). All leak monitoring sensors, LLDs and spill buckets were tested. All equipment tested was in good operational condition. Please provide a copy of the test report to our office within 30 days. A California Hazardous Services, Inc. technician serviced this facility on January 4, 2017, to replace Fill/Piping Sump Penetrations - Replace Supping/Return Secondary test Boot, and sensor inside Generator Room to contain piping. The following were described in the notes: "After investigation the torn supply/return secondary test boot we found that [sic] test boot is torn inside fill/piping sump and the piping is single wall SynFlex. Piping will need to be upgraded. Current piping [Truncated]"

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to observe the storage of hazardous materials, training and record keeping. SPCC Plan was newly written one year ago and covers the facility well. Fuel tank and all piping has secondary containment, even underneath the engine. Training is done yearly for all employees that work on this equipment, and is available to see at time of inspection. Inspections are done regularly and documented. Fuel tank and piping are kept locked inside a fence. Hazard placards are attached to the tank and easy to see. No violations were observed here today.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

records kept by the facility. All sensors passed. Spill buckets passed. Line leak detectors passed. Alarms L15 and L16 are coming on regularly. Brine had to be added to the 91 product sump and diesel product sump. This has been an ongoing issue. I was assured someone would be out soon to look at this problem. Be sure and tell me what the problem is once you determine what it is. Observed a 55 gallon drum of waste fuel/water that has no secondary containment. Provide a source of secondary containment for this drum within 60 days. Once you have fill out the return to compliance form provided on the back page of this report and send a copy to Santa Cruz County Environmental Health. Excellent record keeping for alarm logs and spill cleanup.

Eval Date: 12-11-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site today to witness the annual monitor certification. Liquid sensor in the fill sump for product 87 octane failed. Technician replace the sensor at time of inspection, tested it and it passed. Float switch sensor for product 91 octane failed. Technician replaced the sensor at time of inspection, tested it and it passed. All other sensors passed, including turbine shut down. Fail safe and sensor out passed. Line leak detectors passed. All of the brine sensors and vacuum sensors (except the float switch that failed) passed. All alarms worked properly. The D.O. records are kept up to date. All hazardous waste manifests are kept in order. Training is done regularly and on time. Hazardous waste containers are kept clean, locked and have the proper labels. Both violations were corrected today and this station is in compliance.

Violations Found: No
Routine done by local agency
A routine facility inspection was conducted on this date. Monitoring Certification testing was conducted by Service Station Systems, Inc. All leak monitoring sensors, LLDS and spill buckets were tested. All equipment tested was is good operational condition. Please provide a copy of the test report to our office within 30 days. Also, onsite for the annual Certified Unified Program Agency (CUPA) inspection for the storage, use, and disposal of hazardous materials and/or hazardous wastes. Over the past year, this facility has had a number of high liquid and no vacuum alarms associated with the VPH system. The alarms were tested during the inspection today and passed. All record keeping is being conducted appropriately. Maintenance logs indicate proper testing of vacuum after an alarm and facility always passes maintenance tests following alarms. Investigate the cause of these alarms. Alarms associated with brine should no longer be happening due to construction activities.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

*Lists of Federal NPL (Superfund) sites*

NPL: National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

| Date of Government Version: 10/20/2021 | Source: EPA |
| Date Data Arrived at EDR: 11/05/2021 | Telephone: N/A |
| Date Made Active in Reports: 11/29/2021 | Last EDR Contact: 12/29/2021 |
| Number of Days to Update: 24 | Next Scheduled EDR Contact: 04/11/2022 |

Proposed NPL: Proposed National Priority List Sites
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| Date of Government Version: 10/20/2021 | Source: EPA |
| Date Data Arrived at EDR: 11/05/2021 | Telephone: N/A |
| Date Made Active in Reports: 11/29/2021 | Last EDR Contact: 12/29/2021 |
| Number of Days to Update: 24 | Next Scheduled EDR Contact: 04/11/2022 |

**NPL LIENS:** Federal Superfund Liens
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive
SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Lists of Federal RCRA TSD facilities

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.
RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

- Date of Government Version: 09/13/2021
- Source: Environmental Protection Agency
- Telephone: (415) 495-8895
- Last EDR Contact: 12/17/2021
- Next Scheduled EDR Contact: 04/04/2022
- Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

- Date of Government Version: 09/13/2021
- Source: Environmental Protection Agency

- Last EDR Contact: 12/17/2021
- Next Scheduled EDR Contact: 04/04/2022
- Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System
LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

- Date of Government Version: 07/12/2021
- Source: Department of the Navy
- Telephone: 843-820-7326
- Last EDR Contact: 11/08/2021
- Next Scheduled EDR Contact: 02/21/2022
- Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- Date of Government Version: 08/23/2021
- Source: Environmental Protection Agency
- Telephone: 703-603-0695
- Last EDR Contact: 11/18/2021
- Next Scheduled EDR Contact: 03/06/2022
- Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

- Date of Government Version: 08/23/2021
- Source: Environmental Protection Agency
- Telephone: 703-603-0695
- Last EDR Contact: 11/19/2021
- Next Scheduled EDR Contact: 03/07/2022
- Data Release Frequency: Varies
### Federal ERNS list

**ERNS: Emergency Response Notification System**

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

| Date of Government Version: 09/13/2021 | Source: National Response Center, United States Coast Guard |
| Date Data Arrived at EDR: 09/21/2021 | Telephone: 202-267-2180 |
| Date Made Active in Reports: 12/15/2021 | Last EDR Contact: 12/16/2021 |
| Number of Days to Update: 85 | Next Scheduled EDR Contact: 04/04/2022 |
| Data Release Frequency: Quarterly |

### Lists of state- and tribal (Superfund) equivalent sites

**RESPONSE: State Response Sites**

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

| Date of Government Version: 07/22/2021 | Source: Department of Toxic Substances Control |
| Date Data Arrived at EDR: 07/22/2021 | Telephone: 916-323-3400 |
| Date Made Active in Reports: 10/08/2021 | Last EDR Contact: 10/26/2021 |
| Number of Days to Update: 78 | Next Scheduled EDR Contact: 02/07/2022 |
| Data Release Frequency: Quarterly |

### Lists of state- and tribal hazardous waste facilities

**ENVIROSTOR: EnviroStor Database**

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

| Date of Government Version: 07/22/2021 | Source: Department of Toxic Substances Control |
| Date Data Arrived at EDR: 07/22/2021 | Telephone: 916-323-3400 |
| Date Made Active in Reports: 10/08/2021 | Last EDR Contact: 10/26/2021 |
| Number of Days to Update: 78 | Next Scheduled EDR Contact: 02/07/2022 |
| Data Release Frequency: Quarterly |

### Lists of state and tribal landfills and solid waste disposal facilities

**SWF/LF (SWIS): Solid Waste Information System**

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

| Date of Government Version: 08/09/2021 | Source: Department of Resources Recycling and Recovery |
| Date Data Arrived at EDR: 08/10/2021 | Telephone: 916-341-6320 |
| Date Made Active in Reports: 11/05/2021 | Last EDR Contact: 11/09/2021 |
| Number of Days to Update: 87 | Next Scheduled EDR Contact: 02/21/2022 |
| Data Release Frequency: Quarterly |

### Lists of state and tribal leaking storage tanks
LUST REG 2: Fuel Leak List

Date of Government Version: 09/30/2004
Date Data Arrived at EDR: 10/20/2004
Date Made Active in Reports: 11/19/2004
Number of Days to Update: 30

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield Lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/10/2021

CERS HAZ WASTE: CERS HAZ WASTE
List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.
### US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Number of Days to Update: 83  Next Scheduled EDR Contact: 01/31/2022
Data Release Frequency: Quarterly

Local Land Records

LIENS: Environmental Liens Listing
A listing of property locations with environmental liens for California where DTSC is a lien holder.
Date of Government Version: 08/25/2021  Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/03/2021  Telephone: 916-323-3400
Date Made Active in Reports: 11/22/2021  Last EDR Contact: 11/22/2021
Number of Days to Update: 80  Next Scheduled EDR Contact: 03/14/2022
Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information
A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent
Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination.
CERCLIS provides information as to the identity of these sites and properties.
Date of Government Version: 10/20/2021  Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2021  Telephone: 202-564-6023
Date Made Active in Reports: 11/29/2021  Last EDR Contact: 12/29/2021
Number of Days to Update: 24  Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/30/2021

Date Made Active in Reports: 11/19/2021
Number of Days to Update: 80
Next Scheduled EDR Contact: 03/14/2022
Data Release Frequency: Semi-Annually

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/12/2021
Date Data Arrived at EDR: 09/13/2021
Date Made Active in Reports: 09/28/2021
Number of Days to Update: 15
Next Scheduled EDR Contact: 04/04/2022
Data Release Frequency: Quarterly

CHMIRS: California Hazardous Material Incident Report System
California Hazardous Material Incident Reporting System: CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 06/30/2021
Date Data Arrived at EDR: 07/15/2021
Date Made Active in Reports: 10/06/2021
Number of Days to Update: 83
Next Scheduled EDR Contact: 01/31/2022
Data Release Frequency: Semi-Annually

LDS: Land Disposal Sites Listing (GEOTRACKER)
Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 09/07/2021
Date Data Arrived at EDR: 09/07/2021
Date Made Active in Reports: 11/29/2021
Number of Days to Update: 83
Next Scheduled EDR Contact: 03/21/2022
Data Release Frequency: Quarterly

MCS: Military Cleanup Sites Listing (GEOTRACKER)
Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 09/07/2021

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/13/2021

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing
The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.
**US FIN ASSUR: Financial Assurance Information**

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

**EPA WATCH LIST: EPA WATCH LIST**

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

**2020 COR ACTION: 2020 Corrective Action Program List**

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

**TSCA: Toxic Substances Control Act**

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

**TRIS: Toxic Chemical Release Inventory System**

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.
SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

RMP: Risk Management Plans
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.
PRP: Potentially Responsible Parties
A listing of verified Potentially Responsible Parties

Date of Government Version: 10/20/2021
Date Data Arrived at EDR: 11/05/2021
Date Made Active in Reports: 12/15/2021

Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.
Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

**UMTRA: Uranium Mill Tailings Sites**
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.
LEAD SMELTER 1: Lead Smelter Sites
A listing of former lead smelter site locations.

LEAD SMELTER 2: Lead Smelter Sites
A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931 and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US AIRS MINOR: Air Facility System Data
A listing of minor source facilities.

MINES VIOLATIONS: MSHA Violation Assessment Data
Mines violation and assessment information. Department of Labor, Mine Safety & Health Administration.

US MINES: Mines Master Index File
Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.
US MINES 2: Ferrous and Nonferrous Metal Mines Database Listing
This map layer includes ferrous (ferrous metal mines are facilities that extract ferrous metals, such as iron ore or molybdenum) and nonferrous (Nonferrous metal mines are facilities that extract nonferrous metals, such as gold, silver, copper, zinc, and lead) metal mines in the United States.

Date of Government Version: 05/06/2020  Source: USGS

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

DOCKET HWC: Hazardous Waste Compliance Docket Listing
A complete list of the Federal Agency Hazardous Waste Compliance Docket Facilities.
Date of Government Version: 05/06/2021  
Date Data Arrived at EDR: 05/21/2021  
Date Made Active in Reports: 08/11/2021  
Number of Days to Update: 82  
Source: Environmental Protection Agency  
Telephone: 202-564-0527  
Last EDR Contact: 11/23/2021  
Next Scheduled EDR Contact: 03/07/2022  
Data Release Frequency: Varies

FUELS PROGRAM: EPA Fuels Program Registered Listing
This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.
Date of Government Version: 08/13/2021  
Date Data Arrived at EDR: 08/13/2021  
Date Made Active in Reports: 10/22/2021  
Number of Days to Update: 70  
Source: EPA  
Telephone: 800-385-6164  
Last EDR Contact: 11/15/2021  
Next Scheduled EDR Contact: 02/28/2022  
Data Release Frequency: Quarterly

CA BOND EXP. PLAN: Bond Expenditure Plan
Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.
Date of Government Version: 01/01/1989  
Date Data Arrived at EDR: 07/27/1994  
Date Made Active in Reports: 08/02/1994  
Number of Days to Update: 6  
Source: Department of Health Services  
Telephone: 916-255-2118  
Last EDR Contact: 05/31/1994  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

CORTESE: "Cortese" Hazardous Waste & Substances Sites List
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).
Date of Government Version: 09/20/2021  
Date Data Arrived at EDR: 09/21/2021  
Date Made Active in Reports: 12/08/2021  
Number of Days to Update: 78  
Source: CAL EPA/Office of Emergency Information  
Telephone: 916-323-3400  
Last EDR Contact: 12/16/2021  
Next Scheduled EDR Contact: 04/04/2022  
Data Release Frequency: Quarterly

CUPA LIVERMORE-PLEASANTON: CUPA Facility Listing
list of facilities associated with the various CUPA programs in Livermore-Pleasanton
Date of Government Version: 05/01/2019  
Date Data Arrived at EDR: 05/14/2019  
Date Made Active in Reports: 07/17/2019  
Number of Days to Update: 64  
Source: Livermore-Pleasanton Fire Department  
Telephone: 925-454-2361  
Last EDR Contact: 11/19/2021  
Next Scheduled EDR Contact: 02/21/2022  
Data Release Frequency: Varies

DRYCLEAN SOUTH COAST: South Coast Air Quality Management District Drycleaner Listing
A listing of dry cleaners in the South Coast Air Quality Management District

**DRYCLEAN AVAQMD: Antelope Valley Air Quality Management District Drycleaner Listing**
A listing of dry cleaners in the Antelope Valley Air Quality Management District.

**DRYCLEANERS: Cleaner Facilities**
A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner’s agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholstery cleaning; industrial launderers; laundry and garment services.

**EMI: Emissions Inventory Data**
Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

**ENF: Enforcement Action Listing**

**Financial Assurance 1: Financial Assurance Information Listing**
Financial information

**Financial Assurance 2: Financial Assurance Information Listing**
A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.
### HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

### HWT: Registered Hazardous Waste Transporter Database
A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Data Release Frequency: Quarterly

NOTIFY 65: Proposition 65 Records
Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.
Date of Government Version: 03/12/2021
Date Data Arrived at EDR: 03/16/2021
Date Made Active in Reports: 06/01/2021
Number of Days to Update: 77
Next Scheduled EDR Contact: 03/28/2022
Data Release Frequency: No Update Planned
UIC: UIC Listing
A listing of wells identified as underground injection wells, in the California Oil and Gas Wells database.
- Date of Government Version: 06/03/2021
- Source: Department of Conservation
- Telephone: 916-445-2408
- Last EDR Contact: 12/07/2021
- Next Scheduled EDR Contact: 03/21/2022
- Data Release Frequency: Varies

UIC GEO: Underground Injection Control Sites (GEOTRACKER)
Underground control injection sites
- Date of Government Version: 09/07/2021
- Source: State Water Resource Control Board
- Telephone: 866-480-1028
- Last EDR Contact: 12/07/2021
- Next Scheduled EDR Contact: 03/21/2022
- Data Release Frequency: Varies

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.
- Date of Government Version: 02/11/2021
- Source: RWQCB, Central Valley Region
- Telephone: 559-445-5577
- Last EDR Contact: 10/08/2021
- Next Scheduled EDR Contact: 01/17/2022
- Data Release Frequency: Varies

WDS: Waste Discharge System
Sites which have been issued waste discharge requirements.
- Date of Government Version: 06/19/2007
- Source: State Water Resources Control Board
- Telephone: 916-341-5227
- Last EDR Contact: 11/15/2021
- Next Scheduled EDR Contact: 02/28/2022
- Data Release Frequency: No Update Planned

WIP: Well Investigation Program Case List
Well Investigation Program case in the San Gabriel and San Fernando Valley area.
- Date of Government Version: 07/03/2009
- Source: Los Angeles Water Quality Control Board
- Telephone: 213-576-6726
- Last EDR Contact: 12/14/2021
- Next Scheduled EDR Contact: 04/04/2022
- Data Release Frequency: No Update Planned

MILITARY PRIV SITES: Military Privatized Sites (GEOTRACKER)
Military privatized sites
- Date of Government Version: 09/07/2021
- Source: State Water Resources Control Board
- Telephone: 866-480-1028
- Last EDR Contact: 12/07/2021
- Next Scheduled EDR Contact: 03/21/2022
- Data Release Frequency: Varies

PROJECT: Project Sites (GEOTRACKER)
Projects sites
WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CIWQS: California Integrated Water Quality System
The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials.
PROD WATER PONDS: Produced Water Ponds Sites (GEOTRACKER)
Produced water ponds sites
Date of Government Version: 09/07/2021
Date Data Arrived at EDR: 09/07/2021
Date Made Active in Reports: 11/29/2021
Number of Days to Update: 83
Next Scheduled EDR Contact: 03/21/2022
Data Release Frequency: Varies
Source: State Water Resources Control Board
Telephone: 866-480-1028
Last EDR Contact: 12/07/2021

SAMPLING POINT: Sampling Point ? Public Sites (GEOTRACKER)
Sampling point - public sites
Date of Government Version: 09/07/2021
Date Data Arrived at EDR: 09/07/2021
Date Made Active in Reports: 11/29/2021

Telephone: 202-564-2497
Last EDR Contact: 12/29/2021

PCS INACTIVE: Listing of Inactive PCS Permits
An inactive permit is a facility that has shut down or is no longer discharging.
PCS: Permit Compliance System

PCS is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives
RGA LF: Recovered Government Archive Solid Waste Facilities List
The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

Date of Government Version: N/A
Date Data Arrived at EDR: 07/01/2013
Date Made Active in Reports: 01/13/2014
Number of Days to Update: 196
Source: Department of Resources Recycling and Recovery
Telephone: N/A
Last EDR Contact: 06/01/2012
Next Scheduled EDR Contact: N/A
Data Release Frequency: Varies

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank
The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

Date of Government Version: N/A
Date Data Arrived at EDR: 07/01/2013
Date Made Active in Reports: 12/30/2013
Number of Days to Update: 182
Source: State Water Resources Control Board

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 07/23/2021  Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/10/2021  Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services

### Aquifer Information

**Aquifer:** California Coastal Basin aquifers

**Formation Type:** Purisima Formation

**Construction Date:** 19650610

**Well Depth Units:** ft

**Well Hole Depth Units:** ft

**Well Hole Depth:** Not Reported

**Well Depth:** Not Reported

**Aquifer Type:** Not Reported

**Notes:**
- A nearby site that taps the same aquifer was being pumped.

GEOCHECK VERSION 2.1
STATE DATABASE WELL INFORMATION

Sample date: 15-JUN-17
Chemical: CHLORIDE
Report units: MG/L

Sample date: 15-JUN-17
Chemical: TOTAL DISSOLVED SOLIDS
Finding: 279.
Report units: MG/L

Sample date: 01-JUN-17
Chemical: CHROMIUM, HEXAVALENT
Finding: 8.6
Report units: UG/L

Sample date: 17-MAY-17
Chemical: CHROMIUM, HEXAVALENT
Finding: 11.
Report units: UG/L

Sample date: 06-APR-17
Chemical: CHROMIUM, HEXAVALENT
Report units: UG/L

Sample date: 29-MAR-17
Chemical: NITRATE (AS N)
Finding: 3.1
Report units: MG/L

Sample date: 29-MAR-17
Chemical: FLUORIDE (F) (NATURAL-SOURCE)
Finding: 0.17
Report units: MG/L

Sample date: 29-MAR-17
Chemical: SULFATE
Finding: 33.
Report units: MG/L

Sample date: 29-MAR-17
Chemical: CHLORIDE
Report units: MG/L

Sample date: 29-MAR-17
Chemical: SPECIFIC CONDUCTANCE
Finding: 481.
Report units: US

Sample date: 29-MAR-17
Chemical: PH, LABORATORY
Finding: 7.47
Report units: Not Reported

Sample date: 29-MAR-17
Chemical: ALKALINITY (TOTAL) AS CACO3
Finding: 182.
Report units: MG/L

Sample date: 29-MAR-17
Chemical: BICARBONATE ALKALINITY
Finding: 182.
Report units: MG/L

Sample date: 29-MAR-17
Chemical: HARDNESS (TOTAL) AS CACO3
Finding: 191.
Report units: MG/L

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR’s Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Appendix B  EDR Historic Topo Map Report with QuadMatch™
Hwy 1 State Park Freedom Blvd
Hwy 1 State Park Freedom Blvd
Aptos, CA 95003

Inquiry Number:  6353370.1
February 02, 2021
EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by WRECO were identified for the years listed below. EDR’s Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Appendix D  Certified Sanborn® Map Report
This page intentionally left blank
The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WRECO were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

* Environmental Data Resources, Inc. has been instructed by WRECO to print ONLY the Sanborn Maps for the years listed below:

- 1929 (1)
- 1926 (1)
- 1908 (1)
- 1892 (1)
- 1888 (1)

**Limited Permission To Make Copies**

WRECO (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

**Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.’s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR’s Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

February 3, 2021 – Highway Railroad Corridor Site Walk

Photo 1. Looking east down the tracks from the State Park Drive. Rail line indicates treated railroad-ties are present and potential lead-based paint used on the retaining wall running north of the line.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 2. Gas station located on the corner of Seabridge Road and State Park Drive. Potential spills and leaks from underground storage tanks (UST).

Photo 3. Looking east along the rail line corridor showing potential lead base paint on fence and guard rail, and a transformer on mounted treated wood utility pole.
Photo 4. Looking west, with underground utilities present along Soquel Drive. Railroad ties are also present, and local commercial buildings are located north and south of the line.

Photo 5. The railroad line intersects Trout Gulch Road and has yellow center line and white crosswalk striping. Pacific Gas and Electric gas-line is located traveling underneath the railroad and crossing Soquel Drive.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 6. Looking at Soquel drive traveling west-east. Railroad ties and underground utilities are present. Utilities including electrical and sewer are present with both man holes and electrical boxes.

Photo 7. Looking at Soquel Drive, White edge-line and yellow middle striping are present. Underground utilities including natural gas lines and electrical lines are present.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 8. Looking south down both Soquel drive and the Project area. The roadway has white edge-line, yellow mid-line, and bus access red striping. A vault is present for underground utilities including gas and electric access. Treated railroad ties are also present.

Photo 9. West of the Project area have markers for both electric and gas underground utilities, with a vault present for access. Roadway striping is present with white edge-line and a double mid-line on Aptos Street.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 10. Looking south down the Project area with the Rio Del Mar Boulevard bridge. Wood Treated railroad ties are located along the project area.

Photo 11. Treated wooden utility poles, as well as treated wood railroad ties are present along the Project area.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 12. Runoff from local roadways drain along the Project area.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

February 8, 2021 – Project Corridor Site Walk

Photo 1. Looking northeast at Chevron gas station located at 7719 Soquel Drive. This site previously had an ongoing leaking underground storage tank environmental case which is now closed as of 6/24/2002.

Photo 2. Looking southwest down State Park Drive. White striping paint for lane divider.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California Initial Site Assessment ~ Site Reconnaissance February 3 and 8, 2021; and December 17, 2021

Photo 3. Looking southeast at the overview of the Aptos Creek Bridge-36.001 with yellow striping paint on the center divider and white striping paint on the shoulder.

Photo 4. Looking northeast at a utility pole with transformer in front of residential property (265 Spreckels Drive).
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 5. Looking west at drainage under the Aptos Creek Bridge-36.001 on Spreckels Drive.

Photo 6. Looking northeast at the overview of the Historic Aptos Creek Bridge with yellow striping paint on the center divider and white striping paint on the crosswalk.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 7. Looking northeast at the overview of Spreckels Drive. Utility poles with transformers running along Spreckels Drive.

Photo 8. Looking west on Soquel Drive near the Rio Del Mar Boulevard exit. A gas pipeline running parallel to the freeway.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 9. Looking southeast at Aptos Tire & Auto Care (8028 Soquel Drive). Per GeoTracker, this the status of this site is “Completed – Case Closed as of 6/19/2000”.

Photo 10. Looking southeast at a bridge on Sumner Avenue and Rio Del Mar Boulevard with wooden walkway.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 11. Looking southwest on Soquel Drive with yellow striping paint on the center divide and white striping paint on the shoulder. Utility poles with transformers running along Soquel drive and an in-ground transformer near 9032 Soquel Drive.

Photo 12. Looking northwest at the Soquel Creek Water District compound along Soquel Drive.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 13. Looking east at the intersection of Soquel Drive and Rio Del Mar Boulevard. Yellow and white striping paint on the roadway and utility poles running in all directions.

Photo 14. Looking west an enclosure maintained by the Central Water District that stores chlorine.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 15. Looking east-southeast at the overview of Soquel Drive past Freedom Boulevard. Utility poles with mounted transformer running down the street.

Photo 16. Looking north at the edge of Valencia Lagoon.
December 17, 2021 – Project Corridor Site Walk

Photo 1. Looking downstream on Aptos Creek flowing under Spreckels Drive just north of the intersection of Moosehead Drive and Spreckels Drive.

Photo 2. Large cluster of utilities on one central pole on the southwest corner of Moosehead Drive and Spreckels Drive.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 3. Looking northeast on Moosehead Drive at the intersection of Moosehead Drive and Spreckels Drive. Moosehead Drive is in a residential neighborhood with overhead and underground utilities.

Photo 4. Looking northeast on Moosehead Drive toward Highway 1. Overhead utility poles are present.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 5. Looking northeast at the beginning of the private road that connects Moosehead Drive to Carrera Circle. Highway 1 ROW begins on the other side of the vegetation-covered fence. A private road sign is posted on a tree in the center of the photo.

Photo 6. Looking west from the private road toward the end of the Moosehead Drive public road. Highway 1 ROW is to the right (north). Sewer, water, and power utilities exist throughout.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 7. Looking east from the private road toward Carrera Circle. Highway 1 ROW is to the left (north) of the fence.

Photo 8. Looking south along private road. A tank, likely propane, is shown.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 9. Looking west on private road toward Moosehead Drive. A utility pole with a transformer on southern side of private road and utility boxes are present.

Photo 10. Underground sewer pipeline warning flag on southern side of the private road.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 11. Looking east at a turnaround spot on the private road. A fire hydrant and a utility pole with a transformer are present.

Photo 12. Looking southeast on the private road toward Carrera Circle.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 13. Looking northeast at the private residence addressed 361 Moosehead Drive. The property is located on the private road. A tank, likely propane, is pictured in the center of the photo.

Photo 14. Looking northwest on Carrera Circle toward the private road. A gate separates the private road entrance from Carrera Circle.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 15. Looking north on Sandalwood Drive toward the Tennis Club of Rio Del Mar. Apartments are located on the east (right) side of the road.

Photo 16. Looking south at the railroad west of Sandalwood Drive.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 17. Looking west of the Tennis Club of Rio Del Mar. A sewer pipeline flag is shown.

Photo 18. Looking west at the railroad that crosses State Park Drive. The Highway 1 South on-ramp is to the north. The Seacliff 76 gas station and Complete Auto Repair shop is on the north (right) side of the picture.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 19. Looking west at the railroad that crosses State Park Drive. Utility boxes are shown.

Photo 20. Looking northwest from the railroad that crosses State Park Drive. The mechanic shop and two propane tanks are shown.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 21. Looking northwest from the east side of State Park Drive. The gas station is shown on the west side of State Park Drive.

Photo 22. Looking west from the Coastlands church driveway. A utility pole with transformers is shown.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 23. Looking northeast at the Coastlands church from the State Park Drive Highway 1 on-ramp.

Photo 24. Looking north from State Park Drive to the Highway 1 South on-ramp.
State Route 1 Auxiliary Lanes - State Park Drive to Freedom Boulevard, Santa Cruz, California
Initial Site Assessment ~ Site Reconnaissance
February 3 and 8, 2021; and December 17, 2021

Photo 25. Looking west from the Highway 1 South on-ramp toward State Park Drive.

Photo 26. Looking east from the Highway 1 South on-ramp toward Highway 1 South.

Initial Site Assessment (ISA) Checklist

Project Information

District S  County CAz2  Route ___  Post Mile _____  EA _____
Description: ISA Site Reconnaissance

W4 Highway 1 SR (State Park Drive to Freedom Blvd)

Is the project on the HW Study Minimal-Risk Projects List (HW1)? N/A
Project Manager: Melissa McAssey  phone # 925-941-0017 x 243
Project Engineer: ____________________ phone # ____________

Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

   Structure demolition/modification?  _____ Subsurface utility relocation?  _____

2. Project Setting: Project footprint runs along Hwy 1 from State Park Drive to Freedom Blvd.
   Rural or Urban: URBAN
   Current land uses: COMMERCIAL / RESIDENTIAL
   Adjacent land uses: COMMERCIAL / RESIDENTIAL
   (industrial, light industry, commercial, agricultural, residential, etc.)

3. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.

4. Conduct Field Inspection. Date 2/8/2022 Use the attached map to locate potential or known HW sites.

   STORAGE STRUCTURES / PIPELINES:
   Underground tanks  √ Surface tanks  √
   Sumps  N/A Ponds  N/A
   Drums  N/A Basins  N/A
   Transformers  √ Landfill  N/A
   Other: Adams Creek Running NEAR project footprint

Project Development Procedures Manual  07/01/99
Initial Site Assessment (ISA) Checklist
(continued)

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

Surface staining not observed Oil sheen not observed
Odors not observed Vegetation damage not observed
Other N/A

HAZARDOUS MATERIALS: (asbestos, lead, etc.)

Buildings N/A Spray-on fireproofing N/A
Pipe wrap N/A Friable tile N/A
Acoustical plaster N/A Serpentine N/A
Paint N/A Other N/A

5. Additional record search, as necessary, of subsequent land uses that could have resulted in a hazardous waste site. Use the attached map to show the location of potential hazardous waste sites.

6. Other comments and/or observations: Along Hwy 2: Heavy Traffic, Stripping paint (yellow & white), Stone Park and: Chevron: Safeway Fuel Stations Utility poles w/ transformers along adjacent properties.

ISA Determination

Does the project have potential hazardous waste involvement? YES If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? NO If "YES," explain; then give an estimate of additional time required: Potential ADL, TPH-d, g-mo, pesticides from previous historical land use, PCB's from utility poles w/ mounted transformers.

A brief memo should be prepared to transmit the ISA conclusions to the Project Manager and Project Engineer.

ISA Conducted by ___________________________ Date 2/8/2001
